Yes No

If yes, please indicate plot no. _____

5 Contact Name: _____
Contact Tel No: _____
Fax No: _____
Signature: _____

Guidance Notes

- Section 1 Please provide details of the applicant. We will use the name and address given for correspondence and invoicing.
- Section 2 Please provide full details of the site to include a description of the proposed work (eg. construction of 10 detached houses).
- Section 3 Please indicate the total contract value, without deduction and not simply an estimate of the value of work involving use of water. If the water use is not metered our charges for use of water will be billed at 0.17% of the contract value, where the contract value is greater than £100,000 plus VAT.
- Section 4 If you use an existing metered supply our charges will be based on actual use, as explained in the accompanying leaflet. If you make use of an existing supply without a meter, and work has already commenced, the metering option is not available and charges will be based on the total contract value, if greater than £100,000. For contract value less than £100,000 the property will remain on the current domestic rate of charge.
- Section 5 Please provide details of any site agent, site telephone number, or any person who will be acting on your behalf.

All boxes (1-5) must be completed where applicable

For enquiries regarding this application or other questions relating to your building/development work, please contact us on 0845 850 2777
