

# For around £1 a day...

you can brush your teeth, hop in the shower and drink world-class water straight from the tap. All for less than the price of a takeaway coffee.

## 27p for your daily service

Not only do we supply enough water to make over 10 billion cups of tea every week, we also recycle over 400 million bathtubs full of wastewater.

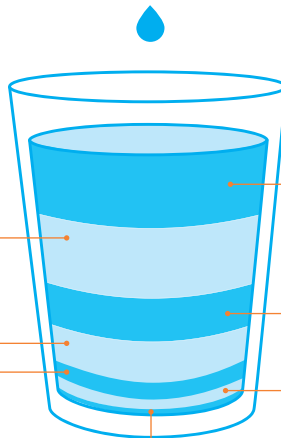

## 16p for our team

From engineers in the field to scientists in the lab, our 6000-strong team works together to keep your world-class water flowing, day and night.

## 6p for the government

We stay on top of all our business rates, PAYE and National Insurance contributions.

## How we spend your £1

## 28p for the future

Every year, we invest millions to improve our network. This includes projects like the Thames Tideway Tunnel, a brand-new sewer that will help to prevent pollution.

## 17p for our lenders

To invest in our infrastructure, we borrow money at efficient rates while always keeping your bills as low as we can.

## 1p reinvested profit

We reinvest profits to improve our service for customers like you.

## 5p for our sites

Turning poo into power generates over 20% of our energy, helping us to save millions in power costs.

Your tap water goes through more quality tests than bottled water – and it costs 500 times less!
