## Gate 1 queries process

<b>Strategic solution(s)</b>	Thames to Affinity Transfer
<b>Query number</b>	TAT001
<b>Date sent to company</b>	13/07/2021
<b>Response due by</b>	15/07/2021 [extended to 21/07/2021]

---

### Query

We request copies of the following documentation:

- Environmental Assessment Report
- Habitats Regulations Assessment
- Strategic Environmental Assessment
- Water Framework Directive Assessment
- Carbon Assessment

---

### Solution owner response

We have uploaded copies of all requested documentation to the RAPID sharepoint portal.

Throughout the development of the gate one study we have had continuous engagement with the EA and NE as described our gate one report. This has included holding monthly progress meetings with the NAU, specific meetings and workshops on particular topics and sharing the assessments referred to in your query. We have previously issued all of the documents relating to this query to the NAU, along with other relevant technical reports and data. We issued a draft version of these documents in April 2021 for review and comment by the NAU.

In order to ensure that the EA and NE had the latest versions of the environmental assessments we have already provided these directly to the NAU representatives for both organisations.

With regard to the carbon assessment for T2AT, this may be found in Section 7 of the Environmental Assessment Report, and has therefore also been previously shared with NAU.

In all cases the documents submitted to RAPID contain information that is commercially confidential. Please ensure that appropriate steps and safeguards are observed in order to maintain the security and confidentiality of this information. Any requests made to RAPID or any organisation party by third parties through the Freedom of Information Act 2000, the Environmental Information Regulations 2004, or any other applicable legislation requires prior consultation and consent by each of Thames Water and Affinity Water before information is released as per the requirements under the respective legislations. The content of the documents requested is draft and relates to material or data which is still in the course of completion in travel to Gate 2, and should not be relied upon at this early stage of development. We continue to develop our thinking and our approach to the issues raised in the document in preparation for Gate 2.

We trust that this satisfactorily deals with the query.
