Other

First name (s)

Last name

Preferred phone number

Email address

I understand that I must provide all relevant lifting equipment, access equipment and labour to enable visual inspections.

Please tick the relevant box(es) below and send us any outstanding information we need to process your application.

## Choose your inspection type

Request an early start

I need to start work on site before Thames Water carries out a full technical review or signs the Section 104 agreement.

I can confirm I've:

Submitted the latest design plans

Paid all inspection fees

Obtained written acceptance from the developer to acknowledge that i) the early start is at their own risk and ii) they understand it may incur extra costs if the design needs to change later

Don't forget that you can't apply for an early start on diversionary work.

Request a pre-start meeting

I'd like Thames Water to attend an on-site meeting to discuss our proposed assets, local practices, special design items, programme of works and the adoption process as well as to agree the frequency of ad-hoc construction inspections.

I can confirm I've:

Submitted the latest design plans

Paid the inspection fee

Request a pre-maintenance inspection

I'd like Thames Water to inspect all manholes and visible structures on-site to make sure they're structurally sound and built in accordance with the approved design.

I can confirm I've:

Received a signed Section 104 agreement

Submitted as-built plans

Completed a CCTV survey for the adoptable sewers

I acknowledge it's my responsibility to manage traffic safely so that Thames Water can access the manholes.

Request a final inspection

I'd like Thames Water to inspect our site, sign off all works as complete and, after the maintenance period ends, enable vesting of the assets in Thames Water.

I confirm I've:

Completed all land and legal matters

Submitted any revised as-built plans

Please complete this form and return it to us at
