

Notification of Works

Please read the following notes before completing this notification.

Any consent granted along with any terms and conditions that may be set does not alter the obligation upon the designer, installer and owner or occupier of the property to ensure that the requirements of the Water Supply (Water Fittings) Regulations 1999 are fully met.

if you are intending to fit **RPZ valves** or **pumps** capable of delivering greater than **12 litres per minute** you will need to complete the appropriate application forms which are available from: water.regulations@thameswater.co.uk or by calling our help desk on 0800 009 3926

This application form meets the requirements of regulation 5 – notification – of the Water Supply (Water Fittings) Regulations 1999 so long as; all mandatory fields marked (*) are completed and a full description of the proposed works along with schematic drawings of the existing and extended system accompany the application.

More information on the Water Regulations can be found here:

https://www.wras.co.uk/plumbing_professionals/advice_for_plumbing_professionals/

If you require any help or advice when completing this form, please contact our Water Regulations Department water.regulations@thameswater.co.uk. Please note that we can only offer advice on how compliance with the regulations can be satisfied. We cannot offer any advice on the design of your system.

You will need to complete this application form for any plumbing work you are proposing that appears in the table below.

We will respond to your notification within 10 days

You will have to comply with any terms and conditions we set as part of our consent

Table 5

1. The erection of a building or other structure, not being a pond or swimming pool.
2. The extension or alteration of a water system on any premises other than a house.
3. A material change of use of any premises.
4. The installation of—
 - a. a bath having a capacity, as measured to the centre line of overflow, of more than 230 litres;
 - b. a bidet with an ascending spray or flexible hose;
 - c. a single shower unit (which may consist of one or more shower heads within a single unit), not being a drench shower installed for reasons of safety or health, connected directly or indirectly to a supply pipe which is of a type specified by the regulator;
 - d. a pump or booster drawing more than 12 litres per minute, connected directly or indirectly to a supply pipe;
 - e. a unit which incorporates reverse osmosis;
 - f. a water treatment unit which produces a waste water discharge or which requires the use of water for regeneration or cleaning;
 - g. a reduced pressure zone valve assembly or other mechanical device for protection against a fluid which is in fluid category 4 or 5;
 - h. a garden watering system unless designed to be operated by hand; or
 - i. any water system laid outside a building and either less than 750mm or more than 1350mm below ground level.
5. The construction of a pond or swimming pool with a capacity greater than 10,000 litres which is designed to be replenished by automatic means and is to be filled with water supplied by a water undertaker or licensed water supplier.
