

Thames Water Utilities Limited (TWUL) Wholesale

Published date: 31 March 2025

Effective date: 1 April 2025

Version 8.0

Wholesale Service Offering

Setting out the operational arrangements between TWUL Wholesale and licensed retailers in connection with the provision of water and wastewater services.

Foreword

This version of the Wholesale Service Offering dated 31 March 2025 was published by Thames Water Utilities Limited ("TWUL") Wholesale and is designated by Thames Water as the Wholesale Service Offering.

This Wholesale Service Offering has been produced to provide guidance on how we will interact with companies who provide retail services to non-household customers. The actual legal relationship between Thames Water and retailers is regulated by relevant legislation and written contracts, which require compliance with, among other things the Wholesale Contract/Wholesale-Retail Code.

This document however, is not intended to create any binding obligations or to be included as part of any contractual terms and conditions between Thames Water and retailers. It should not be relied upon as an accurate summary of any legal obligations that exist elsewhere.

Seeking feedback

This version has been published as the second version for information and use. We intend to publish updates as necessary and appreciate your comments and feedback on the document. Please send your comments to wholesalemarketservices@thameswater.co.uk.

Change control

This document will be updated as necessary when we make changes to the services we offer, for example in response to changes in legislation, including the Wholesale Contract/Wholesale-Retail Code.

Part A – Introduction

Purpose and objectives

We aim to work successfully with you, in ensuring quality, timely and effective delivery of services to non-household customers. To support this, we have established this Wholesale Service Offering to build on the Wholesale Contract/Wholesale-Retail Code. We set out several services we provide that are not covered by the Wholesale Contract/Wholesale-Retail Code and add the specific operational context for the Thames Water Wholesale area to those services that are covered by the Wholesale Contract/Wholesale-Retail Code.

The primary objectives of this Wholesale Service Offering are to:

- explain clearly the details of our services and how we will work with you in providing services, including the responsibilities and service levels of both parties
- set out which services you can order, and how you can order these services
- state which services have discrete charges.

This document has been written with retailers as the primary audience (referred to as “you” throughout). All references to “us” or “we” refer to Thames Water Utilities Limited (TWUL) Wholesale.

Summary

This document contains five parts:

[Part A: Introduction](#) – in this section we provide the context for this Wholesale Service Offering.

[Part B: Doing business with us](#) – here we give you all the essential information on working with us, including:

- setting up and managing your contract with us
- contact arrangements
- ordering services from us.

[Part C: Our services](#) – here we list the services that we provide for you and your customers, covering both water and wastewater services. We have set out each individual service:

- providing a description of each service
- clarifying which of the services you can actively order and those that may impact you or your customers
- showing which services have discrete charges, and the circumstances under which some services may incur charges. Note – full details of our tariffs and the conditions specifying when charges will be payable are set out in our Wholesale Tariff Document.
- giving information on how you can order each service, including any forms you may need to use, and the policies and codes of practice which are particularly relevant to the service.

[Part D: Definitions](#) – a list of the definitions for terms included in our Wholesale Service Offering has been provided.

[Part E: References](#) – a list of the references used in the Wholesale Service Offering has been provided.

[Part F: Appendix](#) – in the Appendix we have listed our policies and codes of practice which guide the way we operate. Copies of these documents can be requested by contacting Wholesale Market Services.

Our tariffs

Our Wholesale Tariff Document, which is available on our website, details our primary, non-primary tariffs, charges for additional services, allowances and arrangements for invoicing, payment and managing credit requirements.

In this document, for each service we have set out whether discrete charges apply to the service and the circumstances under which such charges may be incurred. This document also describes the services we provide relating to assessing, reassessing and reviewing charges, tariffs allowances and abatements.

Our commitment to customers

We are committed to:

- supporting the non-household market and customers
- providing high quality, cost-effective and responsive wholesale services to all licenced retailers
- developing good relationships with all retailers to provide excellent seamless services to your non-household customers
- fully supporting the market operator in the management of the non-household market
- seeking to ensure that there is a level playing field for all market participants and
- providing services in a non-discriminatory way.

In line with our commitment to provide good customer service we will make payments where we do not meet our Guaranteed Standards Scheme Regulations or do not make payments within the required timescales set out in our Guaranteed Standards Scheme Regulations.

All such payments will be paid to you by our Wholesale Market Services function for you to pass on to your non-household customer(s) in accordance with the Wholesale Contract/Wholesale-Retail Code.

Compliance

With the introduction of competition within the non-household market we are committed to full compliance with all relevant legislation, including:

- the Wholesale Contract/Wholesale-Retail Code
- the Water Industry Act 1991
- the Water Act 2014
- the Competition Act 1998
- our Instrument of Appointment (licence)
- the Market Arrangements Code.

We have a governance framework in place to ensure that we will remain compliant if any of the above codes/documents should change.

Service levels

This document describes the service levels which we aim to provide. To help ensure we have sufficient resources to achieve these service levels we have made assumptions regarding the volumes of service requests we will receive, how these service requests will be submitted, and the quality of the information provided. This is based on previous market trends. Our ability to deliver services to these service levels is dependent upon future demand for services being consistent with the forecasted volumes, the method used to submit service requests and the quality of information provided.

Exclusions

The Wholesale Contract/Wholesale-Retail Code gives wholesalers the option to choose whether or not to offer a number of services. For clarity, we describe here the services included in the Wholesale Contract/Wholesale-Retail Code that we have decided not to offer.

Accredited entities – we do not allow accredited entities to provide metering or trade effluent services or disconnections and reconnections requested by non-household customers or disconnections and reconnections for breach of water regulations.

Contribution offers – we do not make contribution offers or enter into contribution agreements in respect of installing meters at premises.

Vacant premises incentive payments – we do not offer incentive payments for the identification and registration of vacant premises.

Discontinuation of a trade effluent consents – we will not discontinue trade effluent consents. If your non-household customer temporarily stops discharging trade effluent, you may request a reassessment of their trade effluent charges. For more information, refer to our [reassessing trade effluent charges](#) service.

Non-public health site specific arrangements – we do not offer non-public health site specific arrangements.

Working directly with non-household customers

There are a number of circumstances in which we may need to make contact with non-household customers or work directly with these customers whilst delivering services. This can include for instance work in relation to meeting our statutory or regulatory requirements, where we are communicating in general with household and non-household customers or where non-household customers have contacted us relating to emergencies, incidents and service issues. Some of these key service-related circumstances are set out in Part C of this document and we have indicated where services can be ordered directly from us by non-household customers.

We have listed here some other services where we work directly with non-household customers, so you can better understand where these relationships exist.

Connection services

These services have been excluded from the Wholesale Contract/Wholesale-Retail Code and are therefore not included in this document. We provide connection services directly to customers, for details of our connection services please refer to our website.

Reducing pollution caused by pesticides

We are required by the Drinking Water Inspectorate to reduce the risk of our drinking water quality standards being breached due to high levels of certain pesticides in some of our catchment areas. Current treatment methods, designed to remove a range of pesticides, are not effective at completely preventing these, from entering the water system. Therefore, we are working with stakeholders such as farmers, landowners and local authorities to raise awareness of the diffuse pollution caused by these pesticides, promote the use of alternative solutions and we may offer financial incentives for reducing pollution caused by pesticide use.

Investigating misconnections

We carry out investigations to identify surface water outfalls which may be polluted by non-household customers' pipework being incorrectly or illegally connected to the public sewerage system (known as a misconnection). Where our site surveys confirm that a misconnection exists, we will notify the relevant non-household customer that they need to rectify the misconnection and will arrange an appointment to check whether the work has been completed correctly.

We may ask you to provide us with information to help us investigate misconnections and if we identify a misconnection at your non-household customer's premises, we will investigate and notify you of any correspondence with your non-household customer.

Recovery of costs from non-household customers

If an incident that we have resolved has been caused by the actions of a non-household customer, or our assets are damaged by a non-household customer we may contact them to recover the costs we have incurred as a result of their actions.

Lead pipes

Non-household customers who are concerned about lead levels in their water supply should contact us directly by phoning our wholesale contact centre, so we can arrange for water samples to be collected and analysed. If the results of the sample analysis show that there are significant levels of lead in the water, we will replace any pipe that belongs to us provided your non-household customer commits to replacing their lead pipework.

Fire hydrants

We work directly with fire authorities within our operational area to install, maintain and repair fire hydrants on our network. Fire authorities may contact us directly to arrange for repairs or other work to be carried out on fire hydrants and we may contact them to arrange site meetings to discuss the scope of work to be carried out or inspect completed work.

We may charge fire authorities for work carried out. For more information regarding our tariffs, please refer to our Wholesale Tariff Document.

Pressure management

Water pressure may be varied in the interest of sustainability and the environment, whilst still maintaining the required minimum level of pressure. This may impact the pressure experienced within a premises.

We work directly with non-household customers to identify whether their internal plumbing will be impacted by a change in pressure and as a discretionary gesture we may offer to provide a technical solution to ensure there is no disruption to water pressure within the building.

If the customer would like us to provide a technical solution, they can instruct us to carry out the work by sending us a signed agreement.

Managing incidents, emergencies and unplanned changes in services

When managing incidents, emergencies and unplanned changes in water and wastewater services, including water quality incidents, we will communicate with all relevant parties, including non-household customers and carry out unplanned site visits to premises where necessary, to ensure issues are resolved and the incident or emergency is concluded as soon as reasonably practical. Further details are set out in Part C.

To ensure we respond effectively to an emergency we maintain emergency plans, which we follow to respond effectively in an emergency situation, minimise its impact and ensure a return to normality as quickly as possible. When we're preparing, testing or reviewing our emergency plans for specific scenarios, we may consult with relevant authorities and ask for information or help from you. Following an emergency, we'll work with you and relevant authorities to identify any lessons learnt and update our emergency plans within 30 business days of the incident being formally closed.

When an emergency is identified, it will be managed by the relevant multi agency group to minimise its impact and ensure a return to normality as quickly as possible. We will inform you when we're involved in the management of

an emergency that may impact on your non-household customers and may ask you to provide a 24 hour emergency point of contact to help us communicate with them.

Meter reads

We do not offer a meter read service. We'll provide one monthly read for each meter connected to our smart network, where data is available. These will be entered as wholesaler reads into CMOS. We do not charge for the provision of these reads.

We also offer a second set of readings each month. Should you wish to obtain the second set please email digitaldataservice@thameswater.co.uk

Digital data service dashboard

Where a digital meter is installed at your non-household customer's property, we will provide users with access to a dashboard. This is available to all retailers and authorised third party.

The dashboard contains the following information:

- status of each meter connected to the network
- read frequency of each meter connected to the network
- 14 days of single meter reads per meter, including time and date of the last read
- continuous flow data per meter

You can export the data shown in this report.

Please be aware, we require information from yourselves to be able to provide access to the dashboard and to satisfy security requirements. Access is provided per user. To request access to this dashboard, please contact digitaldataservice@thameswater.co.uk

Part B – Doing business with us

This section explains how we will work with you to provide services on a day to day basis, the key channels to get things done and to resolve issues and how our contractual arrangements will work.

Contract management

ID:	SC-W027	Service:	Managing contracts
Description:		<p>Contact us</p> <p>Our contracts and accounts management team is here to answer your questions and help you through the process of signing a contract with us. We are available between the hours of 9am – 5pm Monday to Friday, excluding bank holidays and public holidays.</p> <p>You will need to have a Water Supply and/or Sewerage Licence (WSSL) that allows you to act as a water and/or wastewater retailer before requesting a contract. After this we can tell you what steps to take and what information we will need in order to do business with you.</p> <p>You can contact us by:</p> <ul style="list-style-type: none"> • emailing us at wholesalemarketservices@thameswater.co.uk. • Posting to us at Thames Water: <div style="margin-left: 40px;"> c/o Wholesale Market Services Clearwater Court Vastern Road Reading RG1 8DB </div> <p>Requesting a contract</p> <p>When you are ready to request a contract please ensure that the following information has been provided with the request and also signed off by an Executive Director of the licenced retail business or authorised signatory:</p> <ul style="list-style-type: none"> • licence reference or number (where applicable) • business SIC code under the United Kingdom Standard Industrial Classification of economic activities, and corresponding VAT status • your billing and account details • your proposed credit and payment terms • business registered address • key contact details for all authorised signatories and persons involved in contract management: <ul style="list-style-type: none"> ○ contact name ○ postal address ○ email address ○ phone number and/or mobile number • 24-hour contact details • contact details of person for whose attention notices should be marked • contact details of your authorised service requesters (where relevant) <p>Credit and payment terms</p> <p>During pre-contract discussions you will be requested to confirm your payment terms, initially in the checklist and then directly from the contract and account management</p>	

team. Once you have provided these to the contract and account management team we will update our revenue and settlement function who will contact yourselves directly regarding credit terms, where required. The contract and account management team will monitor this process and seek to ensure reasonable timescales are achieved.

Receiving the contract

As a retailer, the Wholesale Contract for Wholesale Services is available to you on the basis of the services you are licenced to provide. Once we have received your application we will evaluate your request and either send you a signed contract or ask for more information. We aim to send you a contract or ask for further information as soon as is reasonably practicable.

When the contract is returned including the signature of your Executive Director of the retail business or authorised signatory and any conditions precedent have been met, we will inform the market operator that you are one of our customers as soon as reasonably practicable. You will then be able to become the registered retailer for Thames Water Wholesale Supply Point IDs (SPID) and order services from Thames Water Wholesale as published in this document. You will be able to serve the customer in accordance with the Wholesale Contract/Wholesale-Retail Code (in some circumstances for Additional Services additional terms and conditions will apply).

Account management

Once you have a signed contract with us we will provide you with a new customer pack which will hold our operating protocols. Your account manager will provide an account management service to you throughout the duration of your contract. This service includes;

- day to day management of your contract
- contract governance, which will include monitoring contract performance with robust key performance indicators (KPIs)
- management of relationship with all retailers purchasing services from Thames Water Wholesale
- manage and resolve contractual dispute and escalations
- management of instances in which the retailer believes the terms and conditions, or delivery of the deal was breached or misunderstood
- carrying out activities to understand retailer satisfaction.

Retailers may request meetings with the contract and account management team to discuss issues they may have at any point in the contracting process.

Contract change

In the instance where the Wholesale Contract/Wholesale-Retail Code is amended via the Market Arrangements Code change process, the contract should be viewed as being changed in accordance with the relevant effective date.

Termination of contract

Termination of the contract will occur in line with the Wholesale Contract for Wholesale Services. We will keep the retailer updated throughout the process of terminating the contract. As applicable, we will notify Ofwat and the market operator within the service levels.

We reserve the right to trigger termination of the contract if notified of you becoming a defaulting trading party with another wholesale signatory to the Market Arrangements Code.

Charges:	Charges do not ordinarily apply to this service.
Availability:	<p>The contracts and accounts management team are available (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none">Monday – Friday, 9am – 5pm <p>This service is available to the following parties:</p> <ul style="list-style-type: none">Retailers, with valid wholesale and/or sewerage licence issued by Ofwat

Bilateral hub

Where the relevant process is mandated in the Bilateral Hub, all requests shall be progressed through the Bilateral Hub. Forms shall be used where the relevant process is not available via the Bilateral Hub.

Portal

Our Portal can be used to submit forms and it can be accessed via our website. You can request up to 5 super user logins to enable you to manage access to our Portal within your company. To request super user access or to notify us that you no longer need super user access e.g. when people move roles or leave, please email wholesalemarketservices@thameswater.co.uk and enter in the subject line FAO your contracts and account manager.

You can use the portal to:

- submit service requests
- track the progress of service requests; and,
- view notifications.

A copy of our Portal user guide can be found on our [website](#).

Email

Excel versions of forms can be sent to:

- emailing the request form to service.requests@thameswater.co.uk; or,
- emailing the request form to wholesalemarketservices@thameswater.co.uk

If you choose to submit forms by email, please send one form per email and attach any supporting documentation or files on the same email. The subject line of the email should include the form reference and the name of the service being requested. Example: B01 for Meter installation.

Additional services

Bespoke forms are available for services that are not in the Wholesale Contract/Wholesale – Retail Code but will be offered to the market by TWUL Wholesale. These forms will be known as the T series.

Terms and conditions

In some circumstances for Additional Services additional terms and conditions will apply. The Additional Terms and Conditions can be found on the respective Thames Water forms. Please make sure you have read all of the terms and conditions related to the delivery of the service before submitting a form or request in any format and you accept liability for any charges associated with that service as set out in our Wholesale Tariff Document.

Managing quotations

Where a service we offer is requested and the work required falls outside of our definition of a standard service we will provide a price on application. A site visit might be required for the preparation of the quote; charges might apply. The quote will be sent to you by Wholesale Market Services.

To accept or reject a quote, you need to reply by email to wholesalemarketservices@thameswater.co.uk, including:

- the quote reference number;
- the unique reference number that relates to the service request; and,
- confirmation of the quoted amount.

By accepting a quote you also accept liability to pay the charges set out in that quote. Following a quote being accepted, you will be liable for the charges, including when that order has been cancelled. We may charge you for any costs reasonably incurred including, for example cost of obtaining any permits or other traffic management measures in line with the Traffic Management Act 2004.

Quotes are valid for three months from the date they were issued, unless otherwise stated for the service (i.e. for metering services, quotes are valid for a period of 14 days) If you don't accept a quote within its time validity period, the quote will be deemed to have expired and the related service cancelled. Where a site survey was required for the production of a quote, you may be charged for that survey. For details of our tariffs, please refer to our Wholesale Tariff Document.

[Rescheduling and cancelling a service](#)

Subject to any specific service related conditions, rescheduling or cancellations of a service or an appointment will be accepted in writing only and no later than 1 business day in advance of the planned visit. After this time, you may still request in writing to reschedule or cancel a service or an appointment but charges will apply, for which you will be liable.

If you reschedule or cancel a service or an appointment with notice of more than 1 business day we will not apply charges, unless a quote has been already accepted where we may charge for any costs reasonably incurred, which you shall be liable for, including costs from obtaining any permits or other traffic management measures in line with the Traffic Management Act 2004.

Where rescheduling or cancelling certain services with short delivery timescales, this will attract abortive charges. In those circumstances, once you have issued the service request you cannot cancel these services without incurring charges, although you can still notify us that the service is no longer required.

All service rescheduling and cancellations can be requested by emailing our Wholesale Service Desk at: wholesalemarketservices@thameswater.co.uk quoting the corresponding unique reference number.

For more information, please refer to our Wholesale Tariff Document.

[Acknowledging your form](#)

We will acknowledge receipt of your form by providing you with a unique reference number upon successful submission.

If the form is rejected, we will provide you with a unique reference number, and also provide a reason for rejecting it.

We will aim to provide you with an acknowledgement of receipt of your form within 1 business day of receiving the request.

[Acknowledging the completion of work](#)

On completion of each service you've requested, you will receive a notification to inform you that the work is complete.

	<p>Changes to services</p> <p>Where a change to our service offering has been made, we will contact you to inform you of the changes that are coming.</p> <p>Contacting us</p> <p>If you want more information about service requests you have submitted, please contact the Wholesale Service Desk by email at: wholesalemarketservices@thameswater.co.uk. Please always have your unique reference number ready when contacting the Wholesale Service Desk. The Wholesale Service Desk is available Monday – Friday, 9am – 5pm, (excluding bank holidays and public holidays)</p> <p>In an emergency, please call our 24 hour wholesale contact centre on (0800 316 9800).</p> <p>Escalations</p> <p>If you want to raise a concern about a request, you should send an email to wmsescalations@thameswater.co.uk.</p> <p>The email needs to include 'ESCALATION' in the subject line and reference the WMS case you want to escalate. In the body of the email you need to explain why you are escalating a case. The following criteria make for a valid escalation:</p> <ul style="list-style-type: none"> • the case has failed its SLA. • you are disputing the outcome of a case (with evidence provided of Thames Water's failings). • there have been failed promises (for example a site visit booked in that never took place). <p>The Escalations Associate will aim to respond to all escalations within 5 working days, and aim to complete all escalations within 20 working days. We also have internal escalation stages so you can escalate if they haven't received a response within 5 business days.</p> <p>The Account Managers are also available to help, but individual cases will be worked by the Escalations Team in order to ensure the quickest possible outcome and an audit trail is in place; please make sure that all escalations are sent through the correct channel, rather than via the Account Managers.</p> <p>SPID transfer</p> <p>We will provide the incoming retailer (providing you have a Wholesale Contract for Wholesale Services with TWUL Wholesale) with a report of all open and in progress service requests for the Supply Point ID being transferred. We will provide you with the report for one Supply Point ID at a time.</p> <ul style="list-style-type: none"> • The report will show: <ul style="list-style-type: none"> ○ type of service requested ○ date the service was requested ○ estimated completion date for that service request ○ current status of the service request. <p>We will also notify the outgoing retailer upon completion of any service requests for the premises switching from you to another retailer. As the outgoing retailer, who originally submitted the service request, any charges associated with the service will be invoiced to you.</p>
Charges:	Charges do not ordinarily apply to this service.
Availability:	Not applicable.

To order:	This is not a service you can order.
Service levels:	Specific service levels do not apply.
Documents related to this service:	Specific documents do not apply.

Contact arrangements

ID:	SC-W012	Service:	Contacting us 24 hours a day
Description:	<p>Effective and timely communication is essential in matters to do with dealing with incidents and emergencies and protecting public health. We will publish information about incidents and emergencies on our online pages, social media and other appropriate channels.</p> <p>You should encourage your non-household customers to communicate directly with us for matters related to changes to their operational service, events and emergencies, and protecting public health so that we are able to collect all the information we may need. In line with our non-household customer enquiries service, you will need to publish our wholesale contact centre number (0800 316 9800) to all of your non-household customers.</p> <p>To enable effective 24 hour communication you may contact us by calling us on the telephone number we will give you when you sign a contract with us. From Monday – Friday, 9am – 5pm you will then be provided with three options, Wholesale Service Desk, revenue and settlement and the wholesale contact centre. Outside of these hours, calls will be forwarded onto our wholesale contact centre. You should contact this line to:</p> <ul style="list-style-type: none"> • notify us of any health and safety concerns • notify us of an unplanned change in water or wastewater services • contact us regarding matters relating to the management of events, incidents and emergencies related to your customers • report any suspected illegal use of water by your customers • report any suspected breaches of water fittings regulations by your customers • report any actual, potential or suspected unconsented trade effluent discharge by your customers • notify us of any pollution reported to you by your customers • report any bogus callers operating in our area. <p>We also expect you to have a 24 hour point of contact for us to use in case we need you to communicate with your non-household customers about an unplanned change in water and/or wastewater services. If we need you to do this, we will include an explicit statement at the beginning of any such communication as to whether we wish you to:</p> <ul style="list-style-type: none"> • take action • prepare to take action; and/or, • be aware of the information in order to react appropriately to any enquiry you receive. <p>Where appropriate, we will proactively contact you to confirm receipt of the information, using the standing on-call arrangements.</p> <p>Sensitive customers</p> <p>We provide a priority phone number, which your non-household sensitive customer can use 24/7 to contact us regarding unplanned changes in water and/or wastewater services or emergencies. You will be provided with the phone number to give to your non-household sensitive customers when we have an agreed Wholesale Contract for Wholesale Services.</p> <p>For your sensitive customers, please refer to our Sensitive Customer Code Of Practice.</p>		
Charges:	Charges do not ordinarily apply to this service.		

Availability:	If you have a contract with us, you may contact us 24/7 by calling us on the telephone number we will give you when you sign a contract with us. From Monday – Friday, 9am – 5pm, you will then be provided with three options and depending upon what you choose this will put you to the relevant team. Outside of these hours, calls will be routed to our wholesale contact centre, to deal with events, incidents, pollutions and emergencies (as set out above).
To order:	This is not a service you can order.
Service levels:	Specific service levels do not apply.
Documents related to this service:	Please refer to the following relevant documents: <ul style="list-style-type: none">• Sensitive Customer Code of Practice

Part C – Our services

This part sets out those services which you can order and other water or wastewater services that may impact you or your non-household customer but which you may not have initiated.

Service catalogue

The service catalogue lists all of the services which can be found within the “Part C – Our services” section of this document. Each service has a description, unique service ID and Wholesale Contract/Wholesale-Retail Code reference; also shown is whether or not the service is orderable, and if so by who, and whether or not it is discretely chargeable. To find the service definition of a service please click on the service ID.

The descriptions within the catalogue give an indication of the service provided. For further information please refer to each service definition, our policies, codes of practice, our Wholesale Tariff Document and the Wholesale Contract/Wholesale-Retail Code.

Service catalogue – services that can be ordered

The table below sets out the services which we will provide. The provision of these services can only be triggered by submitting an order e.g. using a form. Details of what you need to do to order the services are given in the service descriptions, available by clicking on the service ID.

Service area	Service ID	Wholesale Contract/Wholesale-Retail Code Process reference	Service	Description	Who can order	Do charges apply
Tariffs, allowances and payment	SC-W011	H1	Assessing allowances and abatements	We perform a review of the allowances and abatements for firefighting, leakage, non return to sewer and surface water drainage.	Retailers	Yes

Network area map

ID:	SC-W055	Service:	Publishing our network area map
Description:	<p>Operational network area map and postcode search</p> <p>We provide a map on our website in order to support any interested party in understanding our operational area for both water and wastewater services. This operational area map is available on our website.</p> <p>We also have a postcode search, in which any interested party can enter a postcode to check if a particular location falls within the our operational area. This postcode search can be found on our website.</p> <p>This online map and postcode search will also identify new appointments and variations sites that sit within our wider boundary as well as the licenced undertaker for that appointed area. It will also identify the boundary between our operational area and those areas served by an adjoining wholesaler or wholesalers.</p> <p>Keeping the information up-to-date</p> <p>It is our responsibility to keep the operational area map and postcode search up-to-date. In order to do this, we will validate the data every 6 months. We will also make sure that we update our data as soon as we're aware of new postcodes and/or changes to postcodes to which we provide wholesale water and wastewater services.</p> <p>If you think there is an error in the operational area map or in the postcode search, please contact us to let us know by emailing wholesalemarketservices@thameswater.co.uk.</p> <p>Hard copies will not be made available, the map and postcode search that we are providing can be found on our website.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	Our wholesale operational area map and postcode search are publicly available to anyone with internet access, no password is required.		
To order:	This is not a service you can order.		
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • we will review the operational area map and the postcode search every 6 months • we will make ad hoc updates if any changes come through (e.g. new appointments and variations sites) 		

Tariffs, allowances and payment

ID:	SC-W011	Service:	Assessing allowances and abatements
Description:		<p>This service is provided when you wish us to apply or perform a review of the allowances, abatements or similar, applied to a supply point for which you are the retailer.</p> <p>We may also wish to review the allowances, abatements or similar applied to a supply point.</p> <p>For information regarding requests associated with trade effluent charges please refer to our reassessing trade effluent charges service.</p> <p>Firefighting allowance</p> <p>This is a full one-off rebate of the volumetric water charges for any water used to fight a fire, firefighting apparatus testing or training. In addition, an allowance will be provided for the fixed annual charges where the water and wastewater supply pipe is oversized for the purposes of providing water for firefighting purposes, relative to the non firefighting water provision requirements.</p> <p>Apart from when it is impractical, we request that you provide water meter reads before and after the water use, where this is not possible we will agree a reasonable estimate with you before the allowance is applied.</p> <p>We may need to visit your customer's premises to verify information stated and whether the criteria for an allowance or abatement are met.</p> <p>The allowance will be applied through a one-off volumetric adjustment to the previous meter reads. In line with our existing Wholesale Tariff Document the volumetric change will result in a one-off reduction in your water charges. The volumetric change will also be applied to your wastewater charges where you can show the water did not return to our wastewater network.</p> <p>The changes in the charges will be applied by the market operator to the subsequent settlement runs, and we will charge you accordingly.</p> <p>The firefighting allowance is paid in full to the retailer/s registered at the supply point during the allowance period.</p> <p>Leakage allowance</p> <p>A leakage allowance may be given when your non-household customer has suffered a leak on their water supply pipes. This one-off allowance is applied to the volumetric water and wastewater charges. The following conditions apply:</p> <ul style="list-style-type: none"> • the supply point is metered • the leaked water (in part, or entirety) did not return to the public sewer • evidence of the leak has been provided to Thames Water's satisfaction • the leak has been repaired within six weeks of the leak being confirmed to Thames Water • the Allowance is claimed within six months of the date of repair • the leak has not been caused by negligence of the retailer's customer, the retailer, or any third party • only one Allowance will be granted within a 12 month period • if the occupier has changed within 24 months of an Allowance being granted at the premise, the new occupier can make a claim and will not be penalised for a previous occupiers claim • customers with multiple premises or multi supplies on a premises would be able to apply for an Allowance per metered supply in line with the time constraints above 	

- Thames Water has not served a notice in connection with the leak under the provisions of section 75 of The Act.

We may need to visit your customer's premises to verify information stated and whether the criteria for an allowance or abatement are met.

The market requires that you provide only one meter read following the leak repair, however we ask that you take and provide a minimum of two reads following the repair to ensure that the value of any allowance is accurate. If we only receive one meter read, or require further additional reads, we will request this from you. If any additional reads are not forthcoming within 15 business days, we may cancel the request and ask you to reapply with the additional data. The allowance will be calculated such that your water and wastewater charges will exclude the estimated water leaked.

The allowance will be applied against your water and wastewater charges and will be applied by the market operator to the subsequent settlement runs, and we will charge you accordingly.

If the leak is found to be on Thames Water's pipework or at the join of our meter a one off allowance will be applied to water and wastewater charges in order to refund you in full for charges relating to the full leak period.

[Non return to sewer allowance](#)

This is an additional or bespoke allowance where the amount of water returned to the sewer is less than 95% of the water supplied. Where this is the case the volume of wastewater billed be lowered by each full percentage point below 95%. So, if you only return 50% of your total water to the sewer your wastewater bill will be based on a volume that is 50% of the water used, as registered by your water meter.

We may need to visit your customer's premises to verify information stated and whether the criteria for an allowance or abatement are met.

This additional or bespoke allowance will be removed when a premises is registered as vacant by the market operator.

The changes in the charges will be applied by the market operator to the subsequent settlement runs, and we will charge you accordingly.

This allowance will apply from the date of application.

To request an allowance please submit a H/O1 form. Additional information may be required dependant on the type of allowance or abatement being requested. This is to allow us to assess your application and decide if an abatement can be provided. Providing this information using the T/O18 form when you submit your H/O1 form will help us process your application quicker.

Below is a list of the types of return to sewer abatements you can request:

- cooling tower
- swimming pool
- irrigation
- water in product
- livestock
- crop spraying

[Surface water drainage abatement](#)

This is a reduction in the fixed wastewater charges when there is no rainwater feeding into the sewer system. It is only applied when absolutely no rainwater whatsoever from the premises feeds directly or indirectly into the sewer system.

	<p>We may need to visit your customer's premises to verify information stated and whether the criteria for an allowance or abatement are met.</p> <p>A full abatement will be applied to your wastewater charges in cases that satisfy the required criteria. The amounts by which the wastewater charges are reduced are published in our Wholesale Tariff Document and will be applied from the date of application.</p> <p>Other allowances, abatements, contributions or incentives</p> <p>We do not provide any allowances, abatements, contributions or incentives for the following:</p> <ul style="list-style-type: none"> • charges abatements for highways drainage • contributions towards the installation of a meter • incentives for the identification of vacant premises. <p>From time to time, we may become aware that an allowance, abatement or similar is no longer applicable. If so, we will ask you to provide some information so that we can determine if it should change. In some cases we may request to visit the premises to verify the premises status.</p>
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to the Wholesale Tariff Document.</p>
Availability:	<p>This service is available to retailers who have a current contract with us and are the licenced retailer for a waste or water supply points within our operational area.</p> <p>Emails will be monitored during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 5pm <p>If we need to visit the premises we will arrange a visit through you, or directly with your non-household customers; if permission has been granted. The permission can be given in the service application form.</p> <p>If required, appointments will be arranged during our normal working (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 8pm • Saturday, 8am – 4pm • Sunday, 9am – 1pm <p>Please be aware that if an appointment is aborted you may be liable for the costs.</p> <p>Appointments outside our normal working hours can also be scheduled and would need to be agreed and priced on application.</p>

Service levels:	<p>We aim to provide the following service levels as referred in MOSL's Operational Subsidiary Document(s)</p> <ul style="list-style-type: none"> • OSD 0709 - Bilateral Processes for Part H – Allowances, Volumetric Adjustments, assessment requests and applications. Process H1

ID:	SC-W085	Service:	Reviewing our tariffs
Description:	<p>This service is for when you wish us to perform a review of unmeasured or business assessed tariffs applied to a supply point for which you are the retailer. It also describes when we may wish for a service component tariff to be reviewed on an ad hoc basis and the annual tariff review service that we will undertake.</p> <p>Review requested by you</p> <p>This service request will follow the H3 process as set out in the Wholesale Contract/Wholesale-Retail Code. Please see the service levels section below for the outline of the steps and timescales.</p> <p>Under the Wholesale Contract/Wholesale-Retail Code you may apply for a change to metered tariffs.. However, as set out below we establish the metered tariffs annually based on the previous twelve months consumption data, and we would not ordinarily make changes to metered tariffs on request.</p> <p>To support your request it is important to provide us with adequate evidence so we can verify and corroborate your application. This may be in the form of premises assessments, building plans, annotated diagrams, photographs, numbers of employees, signed statements or anything else you consider pertinent. If we think we need some extra information then will we contact you detailing what is needed.</p> <p>We may also need to arrange a visit to a premises to assess the particulars of the request, see section below for site visits and appointments.</p> <p>Review initiated by us</p> <p>This will be done in one of two ways. Firstly, at any given time we may become aware that a service component tariff needs to be changed. Secondly, on an annual basis around the time our updated tariff prices are published; we may review whether supply points are on the correct service component tariffs, based on the latest information we have available at the time.</p> <p>We will use the most up to date historic information present to determine the appropriate tariffs for the coming year.</p> <p>Additionally, to be able to determine what the correct tariff should be, we may need to arrange a site visit to be able to complete an investigation.</p> <p>Application of any changes to the charges</p> <p>Typically, the changes requested will be applied from some future date. If the change is to rectify an error then it may be applied from a historic date, from when it should have applied. In these cases we will let the reconciliation process deliver the corrections and true up any monies owed. Our Wholesale Tariff Document contains any specific rules around back charging that may be pertinent.</p>		
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to the Wholesale Tariff Document.</p>		
Availability:	<p>Site visits and appointments</p> <p>If we need to visit the premises we will arrange a visit through you, or directly with your non-household customer; if permission has been granted. The permission can be given in the service application form.</p>		

	<p>If required, appointments will be arranged during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none">• Monday – Friday, 8am – 8pm• Saturday, 8am – 4pm• Sunday, 9am – 1pm <p>Please be aware that if an appointment is aborted you may be liable for the costs.</p> <p>Appointments outside our normal working hours can also be scheduled and would need to be agreed and priced on application.</p>
To order:	<p>To order this service, please either submit a request via the bilateral hub,. For more information about how to order services please refer to managing service requests.</p>
Service levels:	<p>We aim to provide the following service levels as referred in MOSL's Operational Subsidiary Document(s)</p> <ul style="list-style-type: none">• OSD 0709 - Bilateral Processes for Part H – Allowances, Volumetric Adjustments, assessment requests and applications. Process H3

ID:	SC-WW013	Service:	Reassessing trade effluent charges
Description:		<p>You can request a reassessment of trade effluent charges on behalf of your non-household customer:</p> <ul style="list-style-type: none">• if you would like to request an allowance and/or volumetric adjustment to your water loss and water consumption, please send us form: H/O1, selecting trade effluent at the beginning of the form and Change in Trade Effluent Allowance in section 3 or,• for other requests associated with trade effluent charges, please send us an enquiry via the bilateral hub. <p>Please be aware that our tariffs are based upon an annual review that we carry out of the last 12 months discharge volumes. Any request to reassess outside of this annual review will be charged. For details please refer to our Wholesale Tariff Document.</p> <p>If we receive a billing enquiry from your non-household customer, we will ask them to contact you.</p> <p>When we receive your request we will:</p> <ul style="list-style-type: none">• acknowledge its receipt• check that it's complete• if complete, review it to see if a billing reassessment is required• if it isn't complete or we require further information, we will tell you what information we need. If we do not receive the information within 5 business days we will reject the application and you will need to restart the process providing all required information• contact you or your non-household customer, where you've given us permission to do so, to arrange any site visits necessary to assess the request or ask for further information• carry out any site visits needed. <p>If you've stated that you'd like to be present at the visit, we will notify you of the date and time. If you've said on the request that you want to arrange the visit, we will contact you to agree the date and time.</p> <p>Our decision</p> <p>Once we've completed our assessment of your request, we will either:</p> <ul style="list-style-type: none">• write to you confirming the details of the reassessment. We will then notify the market operator of the changes to the trade effluent charges; or,• write to tell you that the request has been rejected and the reasons why. <p>Reviews initiated by us</p> <p>If we wish to review any allowance in respect of a Trade Effluent Consent we will let you know and may request information from you (or your non-household customer if you do not provide the information). We may consider a site visit is required and will ask your consent to do so and explain why the visit is necessary. If we have not received the information or consent to visit the customer within 20 business days we will contact your non-household customer directly.</p> <p>Where we identify that the method of calculating trade effluent charges or operational parameters needs to be amended, we will let you know and update the market operator. If you want to challenge our decision you should submit your challenge, along with any additional information via the G1 process on the bilateral hub, within 10 business days of receiving our notification.</p>	

Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to the Wholesale Tariff Document.</p>
Availability:	<p>To request a trade effluent charges reassessment on behalf of your non-household customer you must have a valid contract with us and be the registered retailer for the waste supply point.</p> <p>You can request an allowance adjustment and/or volumetric adjustment by sending us form H/01, which should be submitted electronically.</p> <p>You can request other types of billing reassessment by sending us an enquiry via the bilateral hub, which should be submitted electronically.</p> <p>We will make site visits during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 5pm <p>We will arrange appointments during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 5pm

ID:	SC-WW058	Service:	Providing payments for flooding prevention devices
Description:	<p>A FLIP is a flooding prevention device, usually a pump that is strategically placed to mitigate against a premises being subjected to flooding. A FLIP payment is a contribution to the electrical running costs of the FLIP device.</p> <p>Reviewing FLIP payments</p> <p>Once per year we will undertake a review of the FLIP payments to be made to those responsible for the electrical supply of the FLIP devices maintained by us. We make these payments in order to subsidise the costs of running the FLIP devices.</p> <p>Once per year, from January to March, we will undertake a review of the FLIP payment amounts and who they should be made to.</p> <p>We will use the information that we have from the previous year installations and those on the ongoing maintenance list.</p> <p>For every end user (payer for the electrical supply) for whom you are the wastewater retailer we will credit you once per year during the first quarter of the calendar year for all those end users, along with a detailed itemisation of who should be paid what. Payment will be made to the wastewater retailer registered to the wastewater SPID at the time the payment is made.</p> <p>As per the requirement of the Wholesale Contract/Wholesale-Retail Code Part 2: Business Terms, you are obliged to pass the right money onto the right individuals.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	<p>This is not a service that you can request, as it is put in place based on the installation of FLIP devices by us.</p> <p>You may of course have queries over the FLIP payments that we send through to you, for which we are more than happy to respond to. If you have any queries please email: wholesalemarketsservices@thameswater.co.uk and state that you have a FLIP payment query.</p>		
To order:	This is not a service you can order.		
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • we will endeavour to respond to your enquiry within 10 business days. 		

Disconnections and reconnections

ID:	SC-W056	Service:	Disconnecting for non-payment
Description:		<p>You can request to have the water service of any of your non-household customers temporarily or permanently disconnected if they haven't paid their water bills.</p> <p>We currently offer the following services relating to disconnections:</p> <ul style="list-style-type: none"> • temporary disconnection – isolation of the supply from the network, without the removal of any assets or any excavation activity • permanent disconnection – disconnection of the water services with the removal of fixed assets • using our powers of entry service – if we're refused entry to the premises we can obtain a warrant to use any of our 'Powers of Entry'. For further details refer our using our powers of entry at a your request service • out of hours service – if requested by you, or a disconnection is not reasonably practicable within normal working hours, due to any operational constraints. <p>Standard temporary disconnection</p> <ul style="list-style-type: none"> • shutting off an operable outside stop valve • where access has not been refused • does not require street works • does not require traffic management • requires only the commitment of technician resource to deliver the service. <p>Non standard temporary disconnection</p> <p>For non standard temporary disconnections, we offer a site specific quotation.</p> <p>Permanent disconnection</p> <p>For permanent disconnections, we offer a site specific quotation.</p> <p>Please refer to our Disconnections and Reconnections Policy, and our Wholesale Tariff Document for further information.</p> <p>You will be charged for the disconnection visit, irrespective of the disconnection outcome. If the reason why we cannot disconnect is due to a faulty asset on our water network, then we will fix the problem as soon as reasonably practicable, and carry out the disconnection at a later stage.</p> <p>You can request a disconnection by submitting a request via the bilateral hub along with copies of any notice you've served to your non-household customer.</p> <p>Disconnection request</p> <p>If you request a disconnection, we'll check our records and the information you submitted to check if a standard disconnection is possible and whether a survey is required, or not.</p> <p>If we think a standard temporary disconnection can be made or if you have requested a permanent disconnection, we'll arrange a visit to the premises within 12 business days of receiving your request. If requested, we'll let you know of the date and time of our visit. During this visit we will:</p> <ul style="list-style-type: none"> • confirm whether we can make the disconnection 	

- make a requested temporary disconnection, where possible if standard
- carry out a survey, if a standard disconnection is not possible or you have requested a permanent disconnection.

We'll report the findings of our site visit to you, in relation to your disconnection application.

If we are unable to make the standard temporary disconnection during the first visit, we'll arrange a second visit within 6 business days of providing you the report on the initial site visit.

If the disconnection is a non standard or permanent disconnection, we'll prepare a quote and send it to you within 3 business days of either receiving your application or visiting the premises.

After receiving our quote for the non standard disconnection you have:

- 5 business days to accept or reject our quote for temporary non standard disconnections
- 3 months to accept or reject our quote for permanent disconnections.

After that date, your service request will become invalid and you'll need to submit a new request via the bilateral hub.

Disconnection of the water service

If we find that the disconnection is possible during the first site visit, we'll remain at the premises for 30 minutes where we will:

- attempt to contact your non-household customer
- allow your non-household customer to get in contact with you and
- allow you to advise our Wholesale Market Services team, in writing, to cancel the disconnection.

Unless we receive an accepted cancellation notice, we'll carry on with the disconnection.

If we can't make contact with your non-household customer at the time of our visit, we will:

- check to see if a disconnection can be made
- wait at the premises for 30 minutes for your non-household customer to make contact with you; if not, we'll disconnect their water service.

After making the disconnection we'll leave a calling card with your non-household customer to inform them of the disconnection and advising them to contact yourselves.

After our site visit, within 3 business days, we will:

- inform you of our findings and any actions we carried out
- prepare and send you a quote for a non standard temporary disconnection, if required.

Disconnection request changes

For any reason, if you want to cancel the disconnection you've requested, you need to contact us in writing to request a cancellation. Charges may apply. For more information, please refer to our Wholesale Tariff Document.

After the disconnection

We'll notify the market operator within 2 business days of any temporary or permanent disconnection to tell them about any change of connection status at the premises.

	<p>When and if required, we'll inform any other relevant authority, such as the Environmental Health Department, Animal Health and Veterinary Laboratories Agency and/or Defra.</p> <p>Reconnecting your non-household customers</p> <p>You can request us to reconnect your non-household customers as follows:</p> <ul style="list-style-type: none"> • non-household customers temporarily disconnected; reconnection is made through the reconnecting following non-payment disconnection service • non-household customers permanently disconnected; reconnection is made through the new connections service. <p>Powers of entry</p> <p>You can request us to use our powers of entry, where we have been refused access to your non-household customer's premises. For further details refer our using our powers of entry at your request service.</p>
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to our Wholesale Tariff Document.</p>
Availability:	<p>We offer you appointments for disconnections. These are available during our normal working hours (excluding bank holidays and public holidays), subject to availability and additional charges:</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 1 pm • Monday – Friday, 1 pm – 5pm <p>Additionally, if you've requested, we can carry out the disconnection service outside of our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Saturdays, 10am – 4pm • Sundays, 10am – 4pm • Monday – Friday, 5pm – 7pm
To order:	<p>To order this service, please submit a request via the bilateral hub. For more information about how to order services please refer to managing service requests.</p>

ID:	SC-W096	Service:	Disconnecting and reconnecting for non-payment using an accredited entity
Description:		<p>We allow accredited entities to disconnect and reconnect non-household customers connected to our network following instruction from you, for non-payment. The accredited entity must be accredited as a WIRSAE provider by LRQA to carry out temporary disconnections and reconnections for non-payment of retailer invoices within our operational area.</p> <p>Prior to instructing an accredited entity to carry out any work you must provide us with the details for the accredited entity and any information reasonably requested, including a reasonable estimate of the nature and extent of the work you intend to instruct them to do and a reasonable estimate of the work you intend to ask us to do during the course of each financial year. We ask that you provide this information at least 20 business days in advance of asking them to start carrying out work on our network.</p> <p>Following receipt of the information we will check the accreditation and contact you regarding any concerns or queries we have or to inform you that we agree to allow the accredited entity to carry out temporary disconnections and reconnections for non-payment on our network starting on the date agreed by us.</p> <p>We also ask that, as per the Wholesale Contract/Wholesale-Retail Code, on a quarterly basis, you provide us with an update of reasonable estimate of the nature and extent of the work you intend to instruct them to do and a reasonable estimate of the work you intend to ask us to do during the course of each financial. Please send this information by the following dates each year:</p> <ul style="list-style-type: none"> • 1st September • 1st December • 1st March • 1st June <p>by emailing us at wholesalemarketservices@thameswater.co.uk This helps us meet your service needs.</p> <p>Requesting a disconnection</p> <p>Following exhausting all consumer protection measures you may ask the accredited entity to make a temporary disconnection for non-payment by turning an outside stop valve. We do not require advance notice of the work being carried out. However, you will need to submit a request via the bilateral hub to notify us that a disconnection or reconnection has been made and provide the information to enable us to update the market operator within the timescale specified in the Wholesale Contract/Wholesale-Retail Code.</p> <p>Planning a disconnection</p> <p>You or the accredited entity must firstly complete a survey of the premises in question in order to make an assessment of how the premises are currently supplied with water.</p> <p>The survey must include the following as a minimum:</p> <ul style="list-style-type: none"> • any potential multiple occupancy issues on the supply • any foreseen network or additional customer impacts • any known health & safety issues which may exist (e.g. dangerous surroundings). <p>Site surveys should also incorporate, but not be limited to, a review of the following elements:</p> <ul style="list-style-type: none"> • location of the internal and/or external stop valves/stopcocks and disconnection point • follow/trace line/path of supply pipe • other utility plant identification and location 	

- any traffic or pedestrian management including street works licence, permits and noticing information necessary for the accredited entity to plan the work element of the job.

Accredited entities must ensure that all necessary consents and approvals have been obtained, where applicable. These include, but are not limited to the Local Authority and Highways England where road closure, road opening or disruption is likely to occur and prior to any disconnection taking place the accredited entity must confirm:

- that the retailer details and the onsite meter or customer details match; and,
- that the supply to be disconnected is not a shared supply in any way and that there will be no impact on:-
 - supplies to any other customers either non-household or household
 - water services for public use (e.g. for fire fighting etc.)
 - non-household customers that are deemed to be sensitive customers, including the affected customer. We publish our Sensitive Customer Code of Practice on our website.

If any of the instruction details from you do not match the details on site, the accredited entity must not start work and promptly inform you of their findings. The disconnection cannot proceed until any data mismatch is resolved by you.

Adequate records of site assessments and surveys must be kept and we may ask for copies of these for audit purposes.

Making the disconnection

Following completion of a site survey and confirmation that a disconnection can proceed, the accredited entity shall as a minimum complete the following:

- advise the customer that they plan to isolate and disconnect the supply
- provide the non-household customer with a copy of the disconnection notice
- locate isolation/disconnection point
- disinfect tools, fittings, and pipework
- disconnect/isolate the supply by operating the outside stop valve
- tag the outside stop valve, boundary box or chamber
- check for leaks
- record all details.

Please note, that we do not allow accredited entities to make any alterations to pipework, operate control valves on water mains or make permanent disconnections. To allow for notifications of disconnections to be completed during our normal working hours, disconnections must be notified to us by 4pm each day and may only be carried out Monday-Friday (excluding bank holidays and public holiday), to enable us to update our network information in the interest of you and your non-household customer.

If the accredited entity is not able to gain access to the premises they must notify you. You can ask us to use our powers of entry, where access to your non-household customer's premises has been refused. For further details refer to our [using our powers of entry at your request](#) service.

Completing the disconnection

After making the disconnection the accredited entity must:

- leave the site in a safe condition as found on entry
- leave the site clean and tidy
- remove all materials

- wash down the area if required
- make all covers and boundary boxes secure and safe
- remove all debris from all boundary boxes
- ensure the customer has been fully informed of the works.

Reporting the disconnection

Following a temporary disconnection for non-payment being completed the accredited entity must:

- notify you that the disconnection has been made
- report any faults or damage to you
- send the disconnection information as detailed in the Wholesale Contract/Wholesale-Retail Code to you.

You, your accredited entity, or any other third-party acting on your behalf, must:

- contact our Wholesale Service Desk to inform them that the disconnection has been made as soon as possible and within 2 hours of the disconnection being completed, to mitigate the risk of an incorrect reconnection taking place due to a non-household customer communication and to avoid unnecessary charges; and,
- ensure the information provided by the accredited entity meets the requirements of the Wholesale Contract/Wholesale-Retail Code; and,
- submit a request via the bilateral hub within 1 business day of the disconnection having been made to provide the information required to enable us to notify the market operator, with a copy of the disconnection notice provided to the customer.

Requesting a reconnection

Following a temporary disconnection you may instruct the accredited entity to reconnect the supply. We do not require advance notice of the work being carried out.

Planning a reconnection

You or the accredited entity must firstly complete a survey of the premises in question in order to make an assessment of how the premises was supplied with water.

The survey must include the following as a minimum:

- any potential multiple occupancy issues on the supply
- any foreseen network or additional customer impacts
- any known health & safety issues which may exist (e.g. dangerous surroundings).

Site surveys should also incorporate, but not be limited to, a review of the following elements:

- location of the internal and external stop valves/stopcocks and disconnection point
- follow/trace line/path of supply pipe
- other utility plant identification and location
- any traffic or pedestrian management including street works licence, permits and noticing information necessary for the accredited entity to plan the work element of the job.

Accredited entities must ensure that all necessary consents and approvals have been obtained, where applicable. These include, but are not limited to the Local Authority and Highways England where road closure, road opening or disruption is likely to occur and prior to any reconnection taking place the accredited entity must confirm:

- that the retailer details and the onsite meter or customer details match; and,
- that the supply to be reconnected is not a shared supply in any way and that there will be no impact on:-
 - supplies to any other customers either non-household or household
 - water services for public use (e.g. for fire fighting etc.)
 - non-household customers that are deemed to be Sensitive Customers, including the affected customer. We publish our sensitive customer criteria on our website.

If any of the instruction details from you do not match the details on site the accredited entity must not start work and promptly inform you of their findings. No reconnection can proceed until any data mismatch is resolved by you.

Adequate records of site assessments and surveys must be kept and we may ask for copies of these for audit purposes.

Making a reconnection

Following completion of a site survey and confirmation that a reconnection can proceed the accredited entity must comply with the following:

- the metered or unmetered water supply is restored by operating the outside stop valve originally turned and locked off and tagged at the time of disconnection
- ensure sufficient water passes through the meter to ensure the digits turn
- ensure the meter connection points are checked for leaks
- ensure that the property is back in supply and the accredited entity must check with the customer that the restoration of the supply does not cause any internal flooding or pressure issues for the customer.

Any subsequent liability arising from the supply being turned back on will rest with you and the accredited entity.

Please note, that we do not allow accredited entities to make any alterations to pipework, operate control valves on water mains or make connections to the water network.

Completing a reconnection

After making the reconnection the accredited entity must:

- leave the site in a safe condition as found on entry
- leave the site clean and tidy
- remove all materials
- wash down the area if required
- make all covers and boundary boxes secure and safe
- remove all debris from all boundary boxes
- ensure the customer has been fully informed of the works.

Reporting a reconnection

Following a temporary disconnection for non-payment being completed the accredited entity must report any faults or damage and send the reconnection information as detailed in the Wholesale Contract/Wholesale-Retail Code to you. Following receipt of the information, please ensure the information meets the market requirements and notify us via the bilateral hub within 1 business day of the reconnection having been made and provide the information required to enable us to notify the market operator.

	<p>Emergency reconnections</p> <p>If the disconnection has had or is having an adverse effect on our network and/or other customers, for example if we are contacted by a customer who has no water due to work carried out by you or on your behalf (whether deliberately or unintentionally), we may:</p> <ul style="list-style-type: none"> • carry out an emergency reconnection and may charge you; or, • ask you to instruct the accredited entity to carry out an emergency reconnection, which must be completed within 24 hours of us notifying you that an emergency reconnection is required; and/or, • we may request that the accredited entity ceases all work immediately. <p>For more information on disconnections and reconnections, please refer to our Disconnection and Reconnection Code of Practice.</p>
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to the Wholesale Tariff Document.</p>
Availability:	<p>Please send details of the work you intend to ask us and the accredited entity to carry out, quarterly, by emailing us at wholesalemarketservices@thameswater.co.uk</p> <p>You can contact the Wholesale Service Desk by emailing wholesalemarketservices@thameswater.co.uk The Wholesale Service Desk is available Monday – Friday, 9am - 5pm (excluding bank holidays and public holidays)</p> <p>In an emergency, please call our 24 hour wholesale contact centre on 0800 316 9800.</p>

ID:	SC-W057	Service:	Dealing with illegal connection and water use
Description:	<p>Illegal use of water services may include, but is not limited to, theft from bypassing or making an unauthorised connection to the main or service pipe.</p> <p>If you find or suspect illegal use of water, at a premises, inform us of your findings or suspicions immediately by emailing: illegalconnections@thameswater.co.uk.</p> <p>Where we become aware of suspected illegal use we will investigate the matter and decide what action we'll take and may ask you for information to assist our investigations. You will be notified of any visits at our discretion.</p> <p>If we're refused entry to the premises we may request a warrant to gain access. If we execute a warrant at your non-household customer's premises we will notify you.</p> <p>If we identify a gap site which is not an illegal connection, we will register the new connection in the market.</p> <p>If we identify a gap site which is an illegal connection no customer account should be set up until any illegal connection has been rectified.</p> <p>If we identify an illegal connection we will decide what action to take. This may include disconnecting the water supply to the premises and/or advising the customer on how to get a legal connection.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	<p>We will investigate and take appropriate action, where illegal use within our water supply operational area has been identified by you and notified to us.</p> <p>We'll review the information provided to us during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 5pm 		
To order:	This is not a service you can order.		
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • we will acknowledge the information provided to us within 5 business days. At this point we will endeavour to provide you an estimate as to how long the investigation may take and when action will be taken if necessary • at the same time or within 24 hours of making a disconnection we will give your non-household customer a notice and send a copy of that notice to you within 2 business days • if we execute a warrant at your non-household customers premises we will notify you within 2 business days. 		

ID:	SC-W006	Service:	Disconnecting for illegal use
Description:	<p>We will investigate any suspected or reported illegal water use and we will take any appropriate actions considered necessary and within our powers to protect our water network and public health. This may include disconnecting your non-household customers' water supply, without giving them any notice. As part of our investigation into suspected illegal use, we may visit your non-household customer's premises without any prior notice.</p> <p>Illegal use of water services may include, for example, theft by bypassing or tampering with a meter or making an unauthorised connection to the main or service pipe.</p> <p>Where we confirm that an illegal use is occurring and where it's possible (e.g. the supply is not shared with a domestic premise) we will make a disconnection of their water services.</p> <p>You will not be charged for asking us to either investigate suspected illegal use from your non-household customer or to carry a disconnection of confirmed illegal use from your non-household customer.</p> <p>At the time of disconnection</p> <p>We will give your non-household customer notice informing them of:</p> <ul style="list-style-type: none"> • the reason why their water services have been disconnected (i.e. details of the illegality) • how they can arrange for a new legal connection to our network. <p>We will send you and/or any other retailer servicing the premises a copy of any notice we serve on your non-household customer, within 24 hours of the disconnection.</p> <p>We will send your non-household customer an invoice for the cost of the disconnection. We reserve our right to take any appropriate legal steps against any responsible party following the disconnection.</p> <p>Where the use was illegal because of an act or omission by you, we reserve our right to take any appropriate legal steps.</p> <p>We'll notify the market operator, if required, within 2 business days of the disconnection to tell them about any change of connection status at the premises.</p> <p>We will revisit the non-household customer's premises periodically to check if another illegal connection is made.</p> <p>Connecting the non-household customer back onto our network</p> <p>You can have water services connected to the non-household customers' premises following a disconnection for illegal use by applying for a new connection.</p> <p>Powers of entry</p> <p>During the disconnection visit, if we are refused entry to the non-household customers' premises we may seek to obtain a warrant.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	<p>We welcome any leads from you, the general public and other third parties, that could help us identify any non-household customer illegally connected to our water supply. You can notify us of any suspected illegal use of our water services where the premises is within our operational area by emailing illegalconnections@thameswater.co.uk.</p> <p>Disconnection for illegal use is considered to be complete when the disconnection has been made. Following the disconnection, we will keep matters under review e.g. to</p>		

	identify whether legal connection is made and consider whether to take further action against your non-household customer (e.g. prosecution) and/or yourselves.

Receipt of a complaint

Where we have received a complaint from you, we will send you an acknowledgement.

When we receive what we consider to be a complaint directly from a non-household customer (written or via phone call - if we are experiencing long wait times we may offer to call your non-household customer back) we will ask them to contact you as this is the formal route by which complaints will be addressed and recorded.

Non-household customer contacts relating to the following will not be referred to you and handled directly by us:

- the provision of water services and/or wastewater services which indicate a drinking water supply change, sewer flooding or other public health risk; and/or,
- a fault with one of our assets, for example, a broken inspection cover which is a health and safety risk; and/or,
- any service provided directly to a customer.

If your non-household customer has requested written confirmation of the information provided during a call, we will send them the information and provide you with a copy of the correspondence on request.

If you receive any contact from your non-household customer regarding the above points please redirect them as a matter of urgency to our 24/7 wholesale contact centre: Tel: 0800 316 9800.

If we receive any contact by the non-household customer that we consider to be a complaint we will also aspire to contact you (via email) to notify you of the contact and will provide any information, details or attachments that the non-household customer may have sent.

Consumer Council for Water complaints and Water Redress Scheme

As set out in the Wholesale Contract/Wholesale-Retail Code you will need to provide your non-household customers with information about how to escalate their complaint if they remain dissatisfied. This should include contact details for your appointed Redress Scheme provider and the Consumer Council for Water. If we are contacted by the Consumer Council for Water or your Redress Scheme provider or our Water Redress Scheme provider regarding a complaint made by a non-household customer, depending on the nature of the complaint, as described above, we will either:

- where this relates to a wholesaler matter, work with the non-household customer and, where relevant, the Consumer Council for Water and Water Redress Scheme provider to address the complaint or dispute; or,
- forward the correspondence to you and notify the Consumer Council for Water or Water Redress Scheme provider that the complaint or dispute relates to retailer matters and that you will be dealing with it.
- in all cases we will look to work with you collaboratively to address the complaint or dispute.

Claims for loss of business or other requests for compensation

We do not guarantee that there will never be occasions where we have to turn the water supply off or interrupt waste services, for example in the event of planned maintenance work or a burst water main. The legal position with regard to this is that we do not have a liability for loss of profit as this is deemed an economic loss and is not recoverable in law.

Compensation for loss of profit may be payable when it is as a consequence of:

- material/physical damage caused to your property,
- personal injury; or,
- losses due to work being carried out by us (known as streetworks)¹

If your non-household customer contacts us directly seeking compensation we will review their request and if appropriate make a payment to them by cheque. Also, if non-household customers have been impacted by an incident e.g. their property has been flooded due to a burst water main we will contact them directly to minimise the impact on their business, determine any losses incurred and make compensation payments where appropriate. As these claims are handled directly with the claimant we will not provide you with notifications.

If your non-household customer wishes to make a claim through you, you will need to submit a service request on their behalf. In such circumstance we may:

- contact your non-household customer to arrange a site visit where required where you have given us consent to do so,
- issue you and/or the non-household customer with a claim form to gather more information to investigate the claim,
- ask you to seek further information from your non-household customer.

When we have completed our investigation of the claim we will:

- notify you whether the claim has been accepted or rejected along with reasons of rejecting the claim,
- make the payment to you where the claim has been accepted and is related to Guaranteed Standards Scheme Regulations (GSS),
- make the payment to the non-household customer where the claim has been accepted and is related to property damage, personal injury or streetworks¹.

Webchat

When customers visit our website we may ask them if they would like to chat using our webchat facility or ask them if they would like us to call them.

If they would like to talk, we gather information to determine what action is required. If they want to make a complaint we will ask them to contact you as this is the formal route by which complaints will be addressed and recorded.

Non-household customer contacts relating to the following will not be referred to you and handled directly by us:

- the provision of water services and/or wastewater services which indicate a drinking water supply change, sewer flooding or other public health risk; and/or,
- a fault with one of our assets, for example, a broken inspection cover which is a health and safety risk
- any service provided directly to a customer.

Twitter and Facebook

We tweet and post messages on Twitter and Facebook to notify customers of unplanned changes in water and/or wastewater services. We may respond to tweets and messages on Facebook, where appropriate, asking customers to call our wholesale contact centre or contact their retailer.

You can follow us on Twitter: [@thameswater](https://twitter.com/thameswater) and Facebook: Thames Water.

	<p>Short Message Service (SMS)</p> <p>If there is an unplanned change to water service, which affects a large number of customers, we will send text messages to non-household customers, where we hold phone numbers, in the affected area to notify them of unplanned changes in services and progress text updates to let them know what we are doing to restore services. If you would like us to provide this service to your non-household customers or opt-out of this service, you will need submit a T/O12 Provision of Customer Contact Details Form (If opting-in then you must provide the non-household customer telephone number).</p> <p>We also provide information regarding supply interruptions on our automated call handling system and customers can choose to receive regular updates by text message until the matter is resolved.</p> <p>Text messages are used to send information to customers, customers cannot reply to text messages.</p> <p>We are unable to provide you with details of SMS messages and text alerts sent to your non-household customers.</p> <p>There are other arrangements for sensitive customers which are set out in the managing sensitive customer changes in service.</p> <p>¹Schedule 12 of the Water Industry Act 1991.</p>

ID:	SC-W083	Service:	Managing enquiries
Description:		<p>Customer service</p> <p>We will:</p> <ul style="list-style-type: none"> • treat all customers in a professional and courteous manner • ascertain any details necessary to ensure the customer receives good customer service • attempt to resolve the matter at the first point of contact • maintain an accurate record of the contact so the matter can be tracked, monitored and reported. <p>We'll keep the content of our website up-to-date, so all customers may refer to it for the latest information prior to submitting an enquiry.</p> <p>Unplanned changes in service</p> <p>If you receive an enquiry from your non-household customer regarding:</p> <ul style="list-style-type: none"> • an unplanned change in water and/or wastewater services; and/or, • your customer expresses concern regarding water quality; and/or, • a fault with one of our assets, for example, a broken inspection cover which is a health and safety risk. (To report concerns about the accuracy of a meter, please submit a service request) <p>please redirect them as a matter of urgency to our 24/7 wholesale contact centre: Tel: 0800 316 9800.</p> <p>Dealing with enquiries from you and other customers</p> <p>We are committed to providing all of our customers with good service.</p> <p>We will act expeditiously to deal with enquiries e.g. regarding services, invoicing and contracts or any other matter from any of our customers.</p> <p>Submitting an enquiry – non-household customer led</p> <p>If you have received a general enquiry from your non-household customer about water services and/or wastewater services (including drinking water quality) made solely with the intent of eliciting information about those water services and/or wastewater services and in the absence of any expression of concern, dissatisfaction or service shortfall for which you need more information and you'd like to submit an enquiry to us, you should do so by submitting a materially complete service request. You must have a contract with us to be able to use this enquiry service route.</p> <p>If you are sending an enquiry under the circumstance stipulated above and you do not use the bilateral hub, you will be redirected to complete and service request via the bilateral hub.</p> <p>Submitting an enquiry – retailer led</p> <p>All general enquiries from you should be submitted via the bilateral hub, selecting the relevant enquiry type. Please include any supporting evidence/further information if available.</p> <p>Receipt of an enquiry</p>	

Where you submit an enquiry to us via the bilateral hub, you will receive an automatic receipt confirming submission.

Your non-household customers can make enquiries by phoning our 24/7 wholesale contact centre: Tel: 0800 316 9800. If we are experiencing long wait times we may offer to call your non-household customer back. When we receive an enquiry we will ask them to contact you and if known advise them who their retailer is:

- if the enquiry does not relate to an unplanned changes in water and/or wastewater services; and/or,
- if they have ordered a service by submitting an application directly to us.

If your non-household customer has requested written confirmation of the information provided during the call, we will send them the information and provide you with a copy of the correspondence on request.

If a non-household customer directly submits an enquiry to us, where the enquiry relates to an unplanned change in water services and/or wastewater services, water fittings regulations or trade effluent, we shall follow the appropriate processes and notify you accordingly.

If a non-household customer submits any enquiry relating to their bill or requesting a service which must be requested through their retailer to us they will be redirected back to you. If they submit an enquiry relating to a service request that has been or is currently being delivered which has been requested via their retailer we will ask them to contact you and if known advise them who their retailer is.

Webchat

When customers visit our website we may ask them if they would like to chat using our webchat facility or ask them if they would like us to call them:

- if they would like to talk, we will gather information to determine what action is required.

If their enquiry does not relate to:

- the provision of water services and/or wastewater services which indicate a drinking water supply change, sewer flooding or other public health risk; and/or,
- water fittings regulations; and/or,
- trade effluent; and/or,
- a fault with one of our assets, for example, a broken inspection cover which is a health and safety risk; and/or,
- a service provided directly by us.

we will advise them that they need to contact their retailer and if known advise them who their retailer is.

Twitter and Facebook

We tweet and post messages on Facebook to notify customers of unplanned changes in water and/or wastewater services. We may respond to tweets and messages on Facebook, where appropriate, asking customers to call our wholesale contact centre or contact their retailer.

You can follow us on twitter: [@thameswater](https://twitter.com/thameswater) and Facebook: Thames Water.

ID:	SC-W048	Service:	Consulting on drought or dry weather plans
Description:	<p>In line with regulatory requirements as a water company, we are responsible for the implementation of measures set out in our drought plan. This includes the imposition of restrictions during drought. We will take these actions to ensure that our supply demand balance is maintained in surplus in the case of drought.</p> <p>The drought plan sets out the measures that we will take in the event of drought to minimise the risk to security of supply.</p> <p>Implementation of drought measures</p> <p>All measures that may be introduced during a drought are set out in our drought plan which is available on our website. The information below in relation to temporary use bans or drought orders applies to the measures set out in our current drought plan.</p> <p>Implementation of temporary use bans</p> <p>During a drought we will:</p> <ul style="list-style-type: none"> • determine when measures are required to reduce demand • inform retailers operating within our operational area of when a temporary use ban is planned • take into account any comments submitted before the consultation response deadline that the retailers or their customers have in relation to the proposed implementation of a temporary use ban • respond to these comments either directly or collectively through response to our temporary use ban announcement via our website • inform you of the outcome of our consideration of comments received on our temporary use ban proposals and confirm the details of the final decision on implementation of a temporary use ban. <p>Any comments, proposals and/or recommendations submitted late are considered to be invalid and will not normally be taken into account.</p> <p>Implementation of drought orders</p> <p>We will inform you, operating within our operational area of when a drought order to ban non essential use or an emergency drought order is proposed. We will follow the legal requirements in applying for or implementing a drought order to ban non essential use or an emergency drought order.</p> <p>Revision or change of temporary use bans or other drought measures</p> <p>We will inform you when the conditions of a temporary use ban or drought order to ban non essential use or emergency drought order are changed or terminated.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	We will provide you with this service, where you have a contract with us. We will provide a nominated water resource specialist team to respond to and inform you following requests for information in relation to temporary use bans or drought orders.		
To order:	This is not a service you can order.		

Service levels:	We aim to provide the following service levels as referred in MOSL's Operational Subsidiary Document(s) <ul style="list-style-type: none"><li data-bbox="491 293 1318 349">• OSD 0706 Bilateral Processes for Part E: Unplanned Events and incidents. Process E6
-----------------	--

ID:	SC-W021	Service:	Consulting on long term plans
Description:		<p>In line with regulatory requirements as a water company, we are responsible for the development and maintenance of long term water resource management plans and tactical drought plans, which set out the actions that we will take to ensure that our supply demand balance is maintained over a 25 year period and, in the case of its drought plan, the actions we would expect to take in the event of a drought or dry weather conditions.</p> <p>Water resource management plans</p> <p>We have a legal duty to develop and maintain an efficient and economical system of water supply and every five years we are required to produce a water resource management plan. We follow the water resources planning guidelines in developing our plan.</p> <p>Drought plans</p> <p>The drought plan set out the measures that we would take in the event of drought to minimise the risk to security of supply.</p> <p>Consultation and distribution of plans</p> <p>As part of the process of preparation of our drought or water resource management plans, we undertake consultation on the proposed plans with our customers and stakeholders. In addition to customers, statutory and other bodies and organisations, we welcome any reasonable advice (comments, proposals and/or recommendations) by you, where you are operating within our operational area. We may also request you to provide us with any additional information relevant in preparation or revision of those plans.</p> <p>During the consultation process, we will:</p> <ul style="list-style-type: none"> • assess and consider any comments submitted before the consultation response deadline • prepare a statement of response following the consultation in which we will provide the reasoning behind our decision to include or to not accept any of the comments. <p>Normally we will not take into account any comments, proposals and/or recommendations submitted late and these will be considered to be invalid.</p> <p>Upon completion of the consultation, we will:</p> <ul style="list-style-type: none"> • draft the final version of the drought or water resource plans incorporating any comments or advice we consider being valid • submit the final draft plans to Defra approval • publish our plans on our website when approved by Defra. <p>Revision or change of plans</p> <p>Our plans are required to be updated every 5 years. However if there is a material change of circumstance in relation to either plan then we are required to update the plan prior to the statutory 5 year requirement. We also undertake an annual review of our plans and report on progress on the water resource management plan and any updates required in relation to the drought plan.</p> <p>We welcome any comments, proposals and/or recommendations by you at any time, where you have identified a revision or change that you consider needs to be made in our drought or water resource plans. We will then take this into account in determining whether it constitutes a material change of circumstance.</p>	

	<p>We will follow the same consultation process, where any material change to our plans is required.</p> <p>We will then submit the revised plans to Defra for approval.</p> <p>Maintenance of plans</p> <p>We publish the approved plans on our webpage and we will distribute those plans to the retailers upon request.</p>
Charges:	Charges do not ordinarily apply to this service.
Availability:	<p>We will provide you with this service, where you have a contract with us. We will provide a nominated water resource specialist team to respond to and inform you following requests for information, or where we have requested information required for the development or revision of our plans.</p> <p>Any comments, proposals and/or recommendations submitted late are considered to be invalid and will not normally be taken into account.</p>

Managing demand

ID:	SC-W065	Service:	Dealing with customer side leaks
Description:	<p>We will notify you when:</p> <ul style="list-style-type: none"> • your non-household customer contacts us (e.g. by calling our wholesale contact centre) stating that they have a leak on their premises or suspect that they may have a leak • we find a leak on your non-household customer's premises through our proactive leakage programme • we find a leak on your non-household customer's premises whilst we are carrying out other maintenance activities on our water network. <p>Once we are aware that there is or may be a leak on a non-household customer's premises we will liaise with you to arrange an appointment with your non-household customer to investigate the problem.</p> <p>With your agreement, we will arrange appointments directly with your non-household customer.</p> <p>If we identify a leak on your non-household customer's pipework we will let you and your non-household customer know.</p> <p>Fixing the leak</p> <p>It is your non-household customers responsibility to get any leaks on their pipework fixed within the timescales specified by us. Once the leak has been fixed they must notify us by phoning our customer side leakage team. Following, notification that the leak has been fixed, we may carry out a site visit to check the problems has been resolved.</p> <p>If we find a particularly serious non-household customer leak, we may serve notice on your customer requiring them to get the leak fixed within 7 calendar days. We will do this if there is one or more of the following:</p> <ul style="list-style-type: none"> • a health and safety risk • loss of water supply, impacting other customers • property damage, including to neighbouring properties • reduced water pressure impacting other customers; or, • other noticeable customer or environmental impact. <p>We may also, in some circumstances, choose to carry out the work to fix the leak for free. We will notify you, when we have fixed the leak at our cost.</p> <p>Mandatory leakage fix</p> <p>If the leak is not fixed within the required timescale we may have to serve notice on your non-household in order to resolve the matter¹ and charge them accordingly.</p> <p>We will provide you with copies of any correspondence we provide to your non-household customers.</p> <p>¹ Under section 75 of the Water Industry Act 1991.</p>		
Charges:	Charges do not ordinarily apply to this service.		

Availability:	<p>We will usually carry out any investigations during normal working hours (excluding bank holidays and public holidays);</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 5pm <p>We will offer the following appointment windows to your non-household customer:</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 1pm • Monday – Friday, 1pm – 5pm
To order:	This is not a service you can order.
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • we will notify you of any site visit within 2 business days of visiting your non-household customer’s site to investigate a leak or potential leak • if we have not been told that the leak has been fixed we will: <ul style="list-style-type: none"> o after 20 business days from the date we notified you of the leak, advise you that we are prepared to use our powers to fix the leak o after 30 business days from the date we notified you of the leak, tell you the date when we will carry out the work to fix the leak • if we are refused access by a non-household customer to undertake the repair we will notify you within 2 business days of our visit that we have been refused access and that we are seeking a warrant to access the premises. • within 2 business days of receiving a warrant we will notify you of our new planned date to carry out the work • when we complete the work to fix a leak, we will notify you that the issue has been resolved within 2 business days • we will provide you with a copy of all correspondence with your non-household customer within 2 business days.

ID:	SC-W068	Service:	Improving non-household customers water efficiency
Description:	<p>We have a requirement to deliver water efficiency savings/demand reductions across the in-area operations, outlined in the Water Resource Management Plan and Business Plan. We will deliver a range of water saving interventions on both non-household and household sites. Sites will be selected based on consumption and demand reduction potential investigations; selection will require interactions with retailers.</p> <p>There are two main programmes of work:</p> <ol style="list-style-type: none"> 1) water efficiency audits 2) smarter business visits. <p>Water efficiency audits</p> <p>Where sites have been identified as having the greatest potential to save water, we carry out free water efficiency audits and where applicable, make installations to help reduce water use and loss.</p> <p>Firstly we will generate a prioritised list based on our selection criteria and send it to you, for you to confirm customer details. We will then contact the customer and arrange the site visit.</p> <p>Our site visit could include the following actions:</p> <ul style="list-style-type: none"> • conduct a simple water audit to identify applicable water efficiency interventions • install free water efficiency devices • identify and, where practical, fix internal wastage/leakage. <p>We may also recommend other water efficiency improvements that your non-household customer may wish to employ to reduce water consumption.</p> <p>Smarter business visit</p> <p>We deliver water efficiency improvements to non-household sites using a geographical area-based approach. We send letters in advance to all non-household premises, introducing the scheme and informing them of when we will be operating in their area. We then knock on doors and offer the smarter business visit to any non-household premises that wants one.</p> <p>Our smarter business visits include the following actions:</p> <ul style="list-style-type: none"> • fitting of water saving devices (showerhead, showersave, showertimer, tap inserts, kitchen swivel, save-a-flush and EcoBetas) • identify leaking toilets and carry out a free one-off fix; and, • fit free urinal controls where practical. <p>We will discuss with your non-household customer how much water will potentially be saved through the installation of the devices.</p> <p>We may also recommend other water efficiency improvements, not provided by us that your non-household customer may wish to employ to further reduce water use or water losses. We will notify you of any visits carried out to your non-household customers' premises.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	For our water efficiency audit, we will contact you with details of your non-household customers who meet the eligibility criteria for this service. You can pass on our information to your non-household customers or give us permission to contact them direct.		

	<p>We will need you to confirm the contact name and details of the non-household customer.</p> <p>For smarter business visits, we will send out generic letters to non-household customers notifying them that we will be operating in their area.</p> <p>If the non-household customer contacts us to arrange a visit and the visit is planned at least two or more business days in advance we will notify you of the date the visit is planned to take place.</p> <p>When operating in the area, if we carry out an unannounced visit to your non-household customers premises, we will notify you of the visit within 2 business days of the visiting taking place.</p>
To order:	This is not a service you can order.
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • where we have arranged to carry out a visit to a non-household premises and the visit is planned 2 business days or more in advance we will tell you when the visit will take place • we will notify you of any visits to your non-household customers' premises within 2 business days of the visit.
Documents related to this service:	Specific documents do not apply.

ID:	SC-W080	Service:	Investigating leaks
Description:	<p>Our leakage engineers use a range of techniques to identify where problems may exist on our water network. Most of this investigation work does not affect the water services provided to your non-household customers.</p> <p>We will notify any sensitive non-household customers in the area which we are investigating, even if we do not expect their water services to be affected.</p> <p>Whilst investigating a potential leak, we may need to visit your non-household customers' premises:</p> <ul style="list-style-type: none"> • if we are able to plan any visit 2 business days or more in advance, we will arrange the visit directly with your non-household customer and tell you when the visit is taking place • if we are unable to provide advance notice of the visit, we will carry out the visit without prior notice. We will inform you within 2 business days that this visit has taken place. <p>Where we suspect a leak which is not our responsibility to resolve, we will notify you and your non-household customer (for further information, please refer to our dealing with customer side leaks service).</p> <p>Following the visit we will provide you with a copy of any notice or correspondence issued to or served on your non-household customer.</p> <p>Water services interruptions</p> <p>In the event that our work affects the water services provided to your non-household customer, we will let you know via our In your area website as soon as is reasonably practical to do so and at least 48 hours in advance of starting work.</p> <p>We will also notify you if you have any sensitive non-household customers in the area which we are investigating, that are likely to be affected.</p> <p>The information shown on In your area will let you know:</p> <ul style="list-style-type: none"> • the geographical areas affected • the nature of the work • the date and times when the supply is likely to be interrupted • the likely impact on water services • details of our contingency plan, if our works are likely to interrupt the supply for longer than 12 hours. <p>We will update In your area when we start the work and again when we complete it.</p> <p>We will also notify your non-household customers direct and in advance of any investigation work by way of a leaflet or letter drop in the target area.</p> <p>Where we need to carry out work which may affect water services supplied to your non-household customers and we cannot provide 48 hours advance notice, we will notify you within 2 business days of the work having taken place.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	<p>We will usually carry out work during our normal working hours (excluding bank holidays and public holidays);</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 4pm <p>We may also carry out leakage investigation work between 11pm and 5am.</p>

Documents related to this service:	Please refer to the following relevant documents: <ul style="list-style-type: none">• Non-household Customer Side Leakage Policy

ID:	SC-W108	Service:	Incentivising water efficiency
Description:	<p>Whether your non-household customer is a production line, restaurant, hair salon or office block, simple water efficiency improvements can cut their energy and water costs, without reducing their performance. Our water efficiency incentive offer is in line with our requirement to deliver water efficiency savings/demand reductions across the in-area operations, outlined in the Water Resource Management Plan and Business Plan.</p> <p>We invite you to take part in our water efficiency incentive offer, and contribute to our efforts to reduce overall water consumption in the non-household retail market. Our water efficiency incentive offer to you is applied on a supply point by supply point basis and will reward you for proven water efficiencies that you make to your non-household customers. For more information on your reward, please refer to our Wholesale Tariff Document.</p> <p>Only water savings achieved directly from water efficiency interventions will be considered for this offer. For clarity, a repair to a leak does not qualify for a water incentive payment and other specific exclusions apply. These are clarified within the Wholesale Tariff Document. For you to participate in the incentive offer, you are required to submit a Form T/017. This form will require details on the customer (SPID) you have worked with, evidence of the work that has taken place and how much water has been saved. You will be able to apply for this offer once per SPID in a 2 year period.</p> <p>Our water efficiency incentive offer works as follows:</p> <ul style="list-style-type: none"> • Build the baseline. This will require assessment of the existing consumption on site. We would require a minimum of 3 months of meter data, prior to any water efficiency improvements, in order to establish a baseline for the site. Ideally this would be weekly meter reads, however we would accept monthly reads as long as 3 reads taken at equal distances apart were supplied. The meter reads provided would need to be part of your customer's billable water consumption. Alongside the meter reads we would expect basic information on the site, to include but not limited to: Business practice, Full Time Employee (FTE) number and hours per day the site is in use. • Confirm the achievement. We will require a minimum of 3 months of meter reads taken immediately after the water efficiency intervention(s) to confirm that the savings are sustained. The meter reads provided would need to be part of your customer's billable water consumption. In addition to the meter reads we require descriptive and photographic evidence of the water efficiency intervention(s) that have taken place such as photos of devices installed/retrofitted. <p>We reserve the right to carry out audit visits at your non-household customer's premises as part of this offer. During the visit, we may recommend other water efficiency interventions for your non-household customer consideration, which will not affect your water efficiency claim.</p> <ul style="list-style-type: none"> • Reward you. Following our confirmation of your water efficiency submission, we will offer you a fixed payment. For more information in our rewards, please refer to our Wholesale Tariff Document 		
Charges:	Charges do not ordinarily apply to this service. For more information on the payments please refer to our Wholesale Tariff Document.		
Availability:	You are eligible for our water efficiency incentive offer, where you have a contract with us and your non-household customer(s) are within our wholesale water supply area.		
To order:	To order this service, please submit form T/017. For more information about how to order services please refer to managing service requests .		
Service levels:	We will notify you within 15 business days of your submission being received:		

	<ul style="list-style-type: none">• where your water saving have been verified and you are eligible for the payment or not; or• where we require further information to verify your submission. <p>We will make the payment once we have verified your submission.</p> <p>We aim to provide the following service levels, where we have exercised our right to perform audit visits:</p> <ul style="list-style-type: none">• where we have arranged to carry out a visit to a non-household premises and the visit is planned 2 business days or more in advance we will tell you when the visit will take place• we will notify you of any visits to your non-household customers' premises within 2 business days of the visit.

Market data

ID:	SC-W028	Service:	Maintaining existing supply point data
Description:	<p>We maintain supply point data within the market registration system and where we are the data owner we will make any changes that are identified. We can only update the market data if we are the data owners and where we are not the owner and believe it to be incorrect we will query the item with the owner, for example, another wholesaler.</p> <p>Depending on the scope of the changes identified to wholesale owned data items, you can submit a request via bilateral hub for the below:</p> <ul style="list-style-type: none"> • Verification of meter details or meter supply arrangements • Gap site supply point request and addition of service component • Request for deregistration of a supply point or removal of service components; and, • Request for wholesaler to amend third-party reference(s). <p>Once you've informed us that a change is needed to the market data via one of the above we will:</p> <ul style="list-style-type: none"> • investigate your request and check that we are the data owner for that data item. If we're not the data owner we'll reject the request • visit the site if we need to investigate or validate the data associated to the supply point • if we agree that a change is needed to the data, we'll make corrections to the market data by sending the relevant transactions to the market operator; and, • on request provide you with a copy of our investigation or validation. <p>We reserve the right to charge in circumstances where the data already held by the market operator is correct. This will be charged in line with our Wholesale Tariff Document. Where we identify a service component that we believe should be removed, we will let you know when we plan to remove that data with the market operator so that you have an opportunity to challenge the removal.</p>		
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to our Wholesale Tariff Document.</p>		
Availability:	<p>Where we need to make an appointment to carry out a site visit, we will try to make contact with the non-household customer or you (where consent to contact your customer is not given) on 3 separate occasions. If we cannot reach your non-household customer, we will notify you that an appointment has not been booked and ask you to confirm with your non-household customer a date and time suitable for us to attempt a rearrangement of the appointment. You need to respond in writing (via email) within 5 business days, providing us with a suitable date and time and/or alternative contact details and approval to extend the SLA for us to continue with the service request. This date must be within 44 business days of the initial request. If we receive no response within 5 business days we will close the job and you will receive an email to notify you of the closure. Please note we only offer the rearrangement option (including contact attempts on 3 separate occasions) once.</p> <p>Appointments to visit the site will be arranged (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 8pm • Saturday, 8am – 4pm • Sunday, 9am – 1pm 		

	<p>Appointments outside our normal working hours can also be scheduled and these would need to be agreed and priced on application. Where traffic management is required, it may constrain our ability to agree an appointment and/or the time needed to complete the job.</p> <p>If the customer fails to keep an appointment, we will leave a card asking the customer to get in touch with you if another visit is still required. Abortive charges may apply.</p> <p>Where we have agreed an appointment or a date to complete a job outside of the relevant service levels, we will inform you of this agreement and the proposed date of the job. We will notify you to let you know if there are any changes to meter details or supply arrangements via a standard email.</p>

You need to respond via the bilateral hub providing us with a suitable date and time and/or alternative contact details for us to continue with the service request. If you don't respond to the request within the required timescales the case will be closed by the bilateral hub and you will need to raise a new request. We are unable to progress any further requests until you have provided alternative contact details for your customer.</p> <p>Appointments to visit the site will be arranged (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 8pm • Saturday, 8am – 4pm • Sunday, 9am – 1pm <p>Appointments outside of normal working hours are not available for this service. Where traffic management is required, it may constrain our ability to agree an appointment and/or the time needed to complete the job.</p> <p>If the customer fails to keep an appointment, we will leave a card asking the customer to get in touch with you if another visit is still required. Abortive charges may apply.</p> <p>Where we have agreed an appointment or a date to complete a job outside of the relevant service levels, we will inform you of this agreement and the proposed date of the job.</p>
<p>To order:</p>	<p>To order this service, please submit a request via the bilateral hub. Where you are requesting to be registered as the retailer during a new connection request which has been initiated directly with us by the customer, a materially complete New Supply Point Customer Application Form must be attached to the request.. For more information about how to order services please refer to managing service requests.</p>
<p>Service levels:</p>	<p>We aim to provide the following service levels as referred in MOSL's Operational Subsidiary Document(s)</p> <ul style="list-style-type: none"> • OSD 0704 (Bilateral Processes for Part C – Supply Point Address Amendment). Process C5 • OSD 0702 (Bilateral Processes for Part A: New connections). Process A1

ID:	SC-WW040	Service:	Communicating outstanding service requests
Description:	<p>The market operator will notify us when a non-household customer starts the process of switching their retailer. When we receive this notification (in the form of a transaction from the market operator), we'll provide you with information about the status of service requests that the switching non-household customer has in progress.</p> <p>Incoming retailer</p> <p>When you transfer a non-household customer premises, within our network area, we will provide you with a report of all open and in progress service request for this premises. This report will be sent to you in an email, and will show all of the open or in progress requests for the premises Supply Point ID. We will provide you with the report for one Supply Point ID at a time.</p> <p>Within the report you'll be able to see:</p> <ul style="list-style-type: none"> • type of service requested • date the service was requested • the estimated completion date for that service • the current status of the service request. <p>Outgoing retailer</p> <p>We will notify you upon completion of any open or in progress service requests for the premises switching from you to another retailer. As the outgoing retailer, who originally submitted the service request, any charges associated with the service will be invoiced to you.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	<p>This service is available to you (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 5pm <p>We offer this service, to incoming retailers under contract with us, who are providing retail water and/or wastewater services to customers within our boundary.</p>		
To order:	This is not a service you can order.		
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • we will provide a report to incoming retailers within 1 business day of receipt of the market operator transaction which indicates that the retailer has submitted a transfer registration application or identified an erroneous transfer. This service level agreement is subject to the availability of the transactions being sent by the market operator. 		
Documents related to this service:	Specific documents do not apply.		

ID:	SC-W114	Service:	Incentivising gap site registration
Description:		<p>We offer an incentive scheme for the registration of gap sites, in order to participate you must have the following:</p> <ul style="list-style-type: none"> • a contract for wholesale services with us • be successfully registered as the retailer in respect of the gap site under process C3 • not be a self-supply retailer • have a self-billing arrangement set up. <p>This incentive will include an up-front initial payment followed by an allowance on your water and/or wastewater primary charges for year one.</p> <p>Eligibility</p> <p>We will offer one of the following types of incentive:</p> <ul style="list-style-type: none"> • water services only - where the premises is in receipt of water services and only in relation to those services • wastewater services only - where the premises is in receipt of waste services and only in relation to those services • water and wastewater services - where the premises is in receipt of water and wastewater services and in relation to all services. <p>The premises must also meet the following criteria in order to qualify for an incentive:</p> <ul style="list-style-type: none"> • be an eligible premises in accordance with Ofwat guidance – “Eligibility guidance on whether non-household customers in England and Wales are eligible to switch their retailer” • neither a water services supply point nor a sewerage service supply points exists within the Central Market Operator System, i.e. any premises provided with water services and/or sewerage services and already registered in the market for one of these services is not eligible. • has not previously been registered in the market. • for newly connected premises the date of application must be greater than 40 business days after the date of meter installation. • for newly split premises the date of application must be at least 60 business days after the date that the Valuation Office Agency records are updated to reflect the changes. <p>Premises identified as “entry change of use” will not be eligible for a gap site incentive.</p> <p>Application</p> <p>Where you have identified a gap site and wish to be the registered retailer you need to submit a request via the bilateral hub. For cross-company premises you will need to submit separate service request for the water services supply point and sewerage services supply point to the water services and sewerage services wholesalers respectively.</p> <p>For an incentive payment to be made, you must provide all required mandatory information where a piece of information does not exist or is deemed not applicable provide full justification as to why.</p> <p>Further information regarding this can be found in our Gap Site Incentive Policy.</p> <p>When we receive your application, we will assess the information you have provided and then notify you of the following:</p> <ul style="list-style-type: none"> • if we accept your gap application and will be progressing the service 	

- if the application is a duplicate, we will let you know the time and date of the earlier application received. We will only make an initial payment to the first successful application made
- if and why the application is erroneous and whether an administration fee will apply.

Gap site initial payment

If you are eligible for a gap site incentive payment you must ensure that the supply point(s) are tradable within 15 business days of the market operator sending a T107.¹ notify connection complete. We will monitor the status of the supply point(s) and once they become tradable, we will make the initial payment as required in accordance with this scheme. If the supply point(s) do not reach a tradable status within the expected time period, we will close the case and notify you that no incentive payment will be made. You have 10 business days to challenge this decision, please do so by emailing wholesalemarketservices@thameswater.co.uk with the subject line "Gap Incentive Challenge" and include the case reference number.

Application of the gap site tariff

Following the expiry of year one we will apply a 50% allowance to your first year's primary wholesale charges as follows:

- for unmeasured premises we will apply the year one allowance in accordance with the terms of this scheme
- if the customer has not switched during year one, an actual meter read is required in the market within 2 months prior to the expiry of year one otherwise the year one allowance will be due following submission of the first actual meter read after expiry of year one
- if the customer has switched to another retailer during year one and an actual meter read is not submitted to the market within 6 months of the expiry of year one, we may take a check read and use that as the basis of calculating the year one allowance or we can use a market estimation. If, after 6 months of the expiry of year one we were unable to gain access to the premises to enable a meter to be read then the year one allowance will be based on market estimation.

Calculation of incentives

The initial payment will be the amount specified in the wholesale tariff document.

We will apply a 50% allowance to your first year's primary wholesale charges minus the initial payment already given for the individual gap site subject to the following conditions:

- no year one allowance will be paid if all supply points associated with the premises are deregistered within year one, unless due to exit change of use in which case the year one allowance will be based on the primary charges incurred up to the date of deregistration
- for measured premises the year one allowance will be subject to the presence of actual reads in the central market operator system in accordance with the requirements of this service
- we may recover from you part or all the year one allowance if, a data error is subsequently identified which, when corrected, reduces the primary charges for the year one period. This includes but is not limited to erroneous meter reads and the backdating of occupancy status. We will recalculate the year one primary wholesale charges and recover the difference between the original year one allowance amount and the recalculated year one allowance amount.

¹ CSD 301 Data catalogue V11 Feb 2020

	<ul style="list-style-type: none"> For cross-company premises where we are the wastewater wholesaler, we will liaise with the water wholesaler to determine any incentive payment due. We will then make the initial payment for the service that we provide in accordance with our Wholesale Tariff Document. We will calculate the year one allowance based on the primary wholesale wastewater charges for the service that we provide to you.
Charges:	Charges do not ordinarily apply to this service.

Metering and data

ID:	SC-W004	Service:	Installing a meter
Description:	<p>You can ask to have a meter installed at your non-household customer's premises where there isn't one by submitting a request via the bilateral hub.</p> <p>When we receive the request we will:</p> <ul style="list-style-type: none"> • confirm that we've received the request • contact you to arrange a site visit which will determine whether or not we can install a meter and where we will install it (our Metering Policy explains how we decide where to locate the meter); or • where you've given us permission to contact your non-household customer we will visit the premises and where possible we will install the meter at the same visit or agree a date to carry out the work with the customer. If we are unable to access the premises or arrange an appointment with your customer we will make three attempts to contact them to arrange an appointment to carry out the work • share the results of the site visit, including giving you details of why we aren't able to fit a meter • if it hasn't been possible to install the meter at the same time as the visit, we'll contact you, or your non-household customer as above, to arrange a convenient time. We may need to undertake a survey to produce a quote if the installation of the meter proves to be non standard • install the meter and reinstate the site (for external installations) • send the details of the new meter and the first read to the market operator. <p>There is no charge to you where we carry out a standard installation during normal working hours. There will be separate charges for any additional or non standard work, including some services which we will need to give you a quote for. We'll let you know about these before undertaking any work.</p> <p>Details of what meters we will fit, where we will fit them and related standards are set out in our Metering Policy.</p> <p>There may be times when either you or your non-household customer contacts us because something goes wrong after an installation or meter replacement. We see these as unplanned incidents and have 24 hour contact arrangements in place to deal with them.</p>		
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to our Wholesale Tariff Document.</p>		
Availability:	<p>You will be able to apply to have a new meter installed by submitting a request via the bilateral hub.</p> <p>Appointments will be made during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 5pm • Saturday, 8am – 1pm <p>We can also make appointments during specific periods outside our normal working hours, though there will be a charge for this:</p> <ul style="list-style-type: none"> • Monday – Friday evenings, 5pm – 9pm • Saturday, 1pm – 5pm • Sunday, 8am to 5pm 		

	<p>We can even be available at other times to suit your non-household customer but we will consider each request individually and give you a quote for the work.</p> <p>We need you to make sure that we can get access to the site where the meter is to be installed and that there is a safe working environment for our engineer. Where an appointment has been made, it is your responsibility to ensure that your customer or their agent keeps the appointment, or charges will apply.</p>

ID:	SC-W013	Service:	Testing meter accuracy
Description:		<p>Your requests</p> <p>You can ask us to test the accuracy of your non-household customer's meter installed at the property by submitting a request via the bilateral hub.</p> <p>When we do a meter accuracy test, we will remove the meter and send it for testing at a United Kingdom Accreditation Service certified test house. A new meter will be fitted at the same time where possible.</p> <p>When we receive your request we will:</p> <ul style="list-style-type: none"> • confirm that we've received it • assess the application and request any further information which we might need to make a decision on whether to carry out the test. As part of this process we will: <ul style="list-style-type: none"> ○ arrange a site visit. This may require your non-household customer to be at the property but we will contact you or your non-household customer, where you have given permission, if we need to make an appointment. If we have been unable get access to the premises we will write to your non-household customer and may use our powers of entry to carry out the work. Where possible we will exchange the meter at the same visit ○ check to see if there is already a job in progress to test the meter or if one has been done in the last 3 months. If this is the case we'll let you know and send you the results as soon as they are available • we will then be able to give you a decision on whether a test will be carried out but be aware that we won't accept your request if a test has been completed in the last 3 months. If we can't test the accuracy of the meter we'll tell you why • if it hasn't been possible exchange the meter at the same time as the visit, we'll contact you, or your non-household customer as above, to arrange a convenient time. <p>Following the meter accuracy test we will:</p> <ul style="list-style-type: none"> • send the details of the new meter and the first read as well as the final read from the old meter to the market operator • send you the results of the test • send details of any volumetric adjustment to the market operator. <p>There won't be any charge associated with carrying out this service where our meter is inaccurate. If the meter is found to be accurate you will be charged for the associated visit(s), the survey and the cost of exchanging the meter and if we had to use our powers of entry to carry out the work you will be charged for any cost associated with obtaining and using a warrant.</p> <p>There will be separate charges for any additional or non standard work, such as where street works are necessary or where you want the work done outside of our normal working hours. We'll need to give you a quote for some of these services. We'll let you know about these before undertaking any work.</p> <p>Details of what meters we will fit are set out in our meter menu section of our Metering Policy.</p> <p>There may be times when either you or your non-household customer contacts us because something goes wrong after an installation or replacement has been done. We see these as unplanned incidents and have 24 hour contact arrangements in place to deal with them.</p> <p>Disputes committee requests</p>	

	<p>From time to time we receive requests from a disputes committee to carry out a meter accuracy test. When this happens we will visit the property to establish what work is required. When we do a meter accuracy test, we will remove the meter and send it for testing at a United Kingdom Accreditation Service certified test house. A new meter will be fitted at the same time.</p> <p>When we receive a request for a meter accuracy test we will:</p> <ul style="list-style-type: none"> • confirm that we've received it • assess the application and request any further information which we might need to make a decision on whether to carry out the test. As part of this process we will determine if a site survey is required and contact you or your non-household customer (where you've given us permission to do so) to arrange the survey as appropriate. Where possible we will exchange the meter at the same visit • we will then be able to make a decision on whether a test will be carried out but we won't accept the request if a test has been completed in the last 3 months. If we can't test the accuracy of the meter we'll tell you and the requestor why • if it hasn't been possible exchange the meter at the same time as the visit, we'll contact you, or your non-household customer as above, to arrange a convenient time. <p>Following the meter accuracy test we will:</p> <ul style="list-style-type: none"> • send the details of the new meter and the first read as well as the final read from the old meter to the market operator • send you and the requestor the results of the test • send details of any volumetric adjustment to the market operator. <p>You won't be charged when a disputes committee asks us to test a meter.</p> <p>Our requests</p> <p>We may identify meters that we want to test. We'll let you know when we need to do this as we'll need to visit your non-household customer's property to establish what work is required. Testing the meter will involve removing it for testing and installing a replacement meter at the same time.</p> <p>Before performing a meter accuracy test we will:</p> <ul style="list-style-type: none"> • arrange a convenient time with you or your non-household customer (where we have permission to do so) for the meter to be exchanged. <p>Following the meter accuracy test we will:</p> <ul style="list-style-type: none"> • send the details of the new meter and the first read as well as the final read from the old meter to the market operator • send details of any volumetric adjustment to the market operator. <p>There won't be any charge to you when we decide to test a meter.</p>
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to our Wholesale Tariff Document.</p>
Availability:	<p>You will be able to apply to have a meter accuracy test done by submitting a request via the bilateral hub. We may also receive requests from a disputes committee, an arbitration tribunal or another wholesaler and we may initiate a test ourselves.</p> <p>Appointments will be made during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 5pm • Saturday, 8am to 1 pm

	<p>We can also make appointments during specific periods outside our normal working hours, though there will be a charge for this:</p> <ul style="list-style-type: none"> • Monday – Friday evenings, 5pm – 9pm • Saturday, 1pm to 5pm • Sunday, 8am to 5pm <p>We can even be available at other times to suit your non-household customer but we will consider each request individually and give you a quote for the work.</p> <p>We need you to make sure that we can get access to the site where the meter is located and that there is a safe working environment for our engineer. ID:	SC-W037	Service:	Changing meters – retailer request
Description:		<p>You can ask us to change the size or type of meter installed at your non-household customer's premises or to relocate it by submitting a request via the bilateral hub.</p> <p>If we carry out a site visit for any other purpose and identify that the customer has changed their pipework and the meter size and/or location needs to be changed, we will ask you to raise a request via the bilateral hub.</p> <p>When we receive the request we will:</p> <ul style="list-style-type: none"> • confirm that we've received it • assess whether or not we'll be able to resize or relocate the meter. This may include a review of your consumption data • determine if a site survey is required and contact you or your non-household customer (where you've given us permission to do so) to arrange the survey as appropriate. Where possible we will exchange the meter at the same visit • share the results of the visit, including giving you details of whether it would be impractical or infeasible (as per our Metering Policy) to fit a meter • if it hasn't been possible exchange the meter at the same time as the visit, we'll contact you, or your non-household customer as above, to arrange a convenient time to resize or relocate the meter and reinstate the site (for external installations) • send the details of the new meter and the first read as well as the final read from the old meter to the market operator. <p>Our Wholesale Tariff Document sets out the costs for each of these activities and there may be some services which we will need to give you a quote for.</p> <p>Using our powers of entry</p> <p>Where we have been refused entry we will notify you and provide a quote for using our powers of entry. We will not attempt to gain entry to carry out the work, unless you ask us to use our powers of entry.</p> <p>Following a request to use our powers of entry we will write to your customer informing them that we need to access the meter and ask them to contact us within 7 days. If they do not respond we will write to them again, asking them to contact us within 7 days and advising them that we may request a warrant to gain access to the premises. If there is still no response, we will write to them, providing a planned date for the work and informing them that if we are refused access we will apply for a warrant to gain entry to the premises. If we are refused entry we will instruct our legal team to apply for a warrant.</p> <p>If a warrant is granted, we'll notify you of the date and time on which we intend to serve and exercise the powers under warrant and will ask you to confirm in writing that there has been no change in circumstance and the survey and/or entry is still required. We will also provide you with a contact to inform if there is a change in circumstances such that the entry is no longer required.</p> <p>Once we have gained access to the premises we shall, as appropriate change the meter.</p> <p>We will then confirm to you that we have gained entry to the premises and completed the work.</p> <p>Using our powers of entry at your request service requires a price on application. For more information, please refer to our Wholesale Tariff Document.</p> <p>If a warrant is not granted, we will inform you of the reasons.</p> <p>Bailiffs</p> <p>We may engage bailiffs to serve the warrant on your non-household customer and, if necessary, we will also contact the police to gain their assistance in accessing the</p>	

	<p>premises. If, as a result of requesting such assistance, there is a change of the planned date and time on which the warrant will be served, we'll notify you of the new date and time. You will be charged for these services.</p> <p>There may be time when either you or your non-household customer contacts us because something goes wrong after an installation or replacement has been done. We see these as unplanned incidents and have 24 hour contact arrangements in place to deal with them.</p>
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to our Wholesale Tariff Document.</p>
Availability:	<p>You will be able to apply to have a meter relocated or to have the size or type of meter changed by submitting a request via the bilateral hub.</p> <p>Appointments will be made during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 5pm • Saturday, 8am – 1pm <p>We can also make appointments during specific periods outside our normal working hours, though there will be a charge for this:</p> <ul style="list-style-type: none"> • Monday – Friday evenings, 5pm – 9pm • Saturday, 1pm to 5pm • Sunday, 8am to 5pm <p>We can even be available at other times to suit your non-household customer but we will consider each request individually and include this in the quote for the work.</p> <p>We need you to make sure that we can get access to the site where the meter is to be installed and to that there is a safe working environment for our engineer. Where an appointment has been made, it is your responsibility to ensure that your non-household customer or their agent keeps the appointment, or charges will apply.</p>

ID:	SC-W095	Service:	Providing digital meter data
Description:		<p>We can provide a chargeable digital meter data service to deliver regular meter data where the meter is under our smart network coverage. For these meters we are able to collect regular meter readings on a continual basis.</p> <p>Details of what meters we will fit, where we will fit them and related standards are set out in our Metering Policy. Further information is also available in our Getting data from Thames Water meters guidance on our website.</p> <p>Where a digital meter is installed at your non-household customers property and this is inside our smart network you can request digital meter data by completing the T/O15 digital meter data request form. You are responsible for satisfying yourself that you have the appropriate lawful basis to record and/or collect and/or process the consumption data and that lawful basis is current at all times during the collection and processing of that consumption data. We shall take no liability and/or responsibility for your decision to collect and/or record and/or process the consumption data.</p> <p>In relation to data protection you must comply with:</p> <ul style="list-style-type: none"> (a) all relevant data protection legislation including (but not limited to) the General Data Protection Regulations; and, (b) all codes of practice, guidance and standards issued by the Information Commissioner's Office from time to time. <p>In providing this service we will comply with data protection laws. This would include provision of all data by using secure transfer mechanism and appropriate permission from customers to collect data.</p> <p>Data will be transferred to you using a secure connection which we will provide details of at the appropriate time.</p> <p>Where you apply for this service for the first time we need to configure our systems to extract and send the data and arrange the secure transfer mechanism (SFTP). We will need to work with you in order to set this up.</p> <p>For any individual meter this service may include one of the following, depending on what you need. There will be a different charge for each service. The service includes:</p> <ul style="list-style-type: none"> • system set up and registration (first time users) • meter set up (individual basis) • upgrade of read frequency • meter set up (bulk request) <p>Although sometimes we cannot guarantee completeness of meter reading data, we will provide you with the most complete information based on what we obtain.</p> <p>When we receive your request we will:</p> <ul style="list-style-type: none"> • confirm that we've received it, assess the application and request any further information which we might need to make a decision on whether we are able to provide the digital meter data service. • check whether the meter has a Local Communication Equipment (LCE) unit attached and if it is currently in Advanced Metering Infrastructure (AMI) mode. <ul style="list-style-type: none"> ○ if no LCE is present one will need to be installed and we will attend the premises to complete this. No interruption to supply will be needed. ○ if the meter has an LCE but is not in AMI mode we may also need to attend site to resolve this. This can be corrected in many cases by resetting the LCE or replacing the LCE and/or meter. 	

	<ul style="list-style-type: none"> o if the meter will not connect in AMI mode after a field investigation then providing digital data is not feasible and we will advise you of this <p>You can also use our Digital Data Service dashboard to allow you to self-serve and view which meters are ready for DDS and which would require further works to allow DDS to be possible. To request access to this, please email us at: digitaldataservice@thameswater.co.uk</p> <p>When the set-up is complete we can supply the regular data service at the agreed frequency.</p> <p>There will be separate charges for any non-standard activity, such as carrying out work outside of our normal working hours, which we will need to give you a quote for. We'll let you know about these before undertaking any work.</p> <p>Should you wish to terminate your digital meter data service, please email us at: digitaldataservice@thameswater.co.uk providing the relevant meter serial number and termination date.</p>
Charges:	<p>Charges apply to this service.</p> <p>For more information, please refer to our Wholesale Tariff Document.</p>
Availability:	<p>You will be able to request the digital meter data service by completing the T/015 digital meter data request form. You are responsible for satisfying yourself you have the appropriate lawful basis to record and/or collect and/or process the consumption data and that lawful basis is current at all times during the collection and processing of that consumption data. We shall take no liability and/or responsibility for your decision to collect and/or record and/or process the consumption data.</p> <p>If we need to carry out work on the meter we will usually carry out our work during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday - Friday, 8am - 5pm • Saturday, 8am - 1pm <p>We may be able to offer this service at other times as a non-standard service to suit your non-household customer but we will consider each request individually and give you a quote for the work.</p>
To order:	<p>To order this service, please submit the T/015 Digital meter data request form.</p> <p>If you would like to submit a bulk request, an additional form will need to be sent to DigitalDataService@Thameswater.co.uk prior to submitting the T/015 Digital meter data request form. This will be reviewed and returned to you with comments to confirm if the meter can be requested as part of a bulk application or the reason why it can't. Once you have received the returned form you will then need to submit the T/015 Digital meter data request form and attach the returned form, removing any meters that cannot be requested. Please contact the team at DigitalDataService@Thameswater.co.uk if you have not been supplied with this additional form.</p> <p>Please note, any meters that cannot be requested via the bulk process may be requested individually. We'll provide feedback from the bulk request and let you know where this is applicable.</p> <p>Bulk requests can be submitted to us in batches of up to 10 or up to 100 if:</p> <ul style="list-style-type: none"> • the meters are in AMI mode; and • no frequency change is required (already set to 15 minutes or hourly) <p>For more information about how to order services please refer to managing service requests.</p>

Service Levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none">• for a first time application we will set-up the data service and establish the secure file transfer mechanism. We will need to work with you to set up the file transfer mechanism and will complete this within 15 business days• where the digital meter falls under our smart network, the meter is in AMI mode and there are no issues with the meter infrastructure, we will start providing the data within 5 business days of submission of a complete application. Where further activities are required for example when an LCE unit needs to be installed, the meter is not currently in AMI mode, or where the read frequency needs to be updated the length of time it takes to facilitate this service will be increased. We will endeavour to provide you a forecast completion date for the service.• we will investigate flatlining of data within 22 business days of becoming aware of the issue.

ID:	SC-W113	Service:	Using our powers of entry to enable a meter read
Description:		<p>This service is provided where you are unable to gain access to your non-household customers' property to obtain a meter read.</p> <p>You can ask us to write to your non-household customer and the owner concurrently to arrange an appointment to gain entry to their premises to enable a meter read by completing the T/O19 form and submitting it to us.</p> <p>When sending your application to us, we require you to send evidence of the following:</p> <ul style="list-style-type: none"> • attempts you have made to gain access and the respective dates • letters and calls requesting access and the respective dates • final attempt to gain access and the respective date • final letter sent to your non-household customer where you have attempted to arrange an appointment to obtain a meter read and have subsequently referred this to us. <p>This information is required in order to complete the witness statement which will be used in court if necessary. Please submit these documents along with your application form.</p> <p>When we receive this request, we will assess whether you have provided satisfactory evidence of contacting your non-household customer to obtain a meter read and process your application, we will contact you if we require additional information.</p> <p>Upon acceptance of your request we will write to your non-household customer and the registered owner to arrange an appointment to enable a meter read.</p> <p>If we still have no response within 14 days, either ourselves or our legal representatives will then send a letter asking for:</p> <ul style="list-style-type: none"> • the customer to contact us to arrange an appointment to read the meter • If no contact is made within 7 days, we will need your confirmation that you wish to proceed to phase II where we will provide you with a price on application • we will require your acceptance of the price on application within 10 business days in order for us to proceed to the next stage and apply to the courts for a warrant to gain access to the property <p>Once we have applied to the courts, your customer will receive a letter from our legal representatives notifying them in writing with an invitation to attend court.</p> <p>Exercising our powers of entry</p> <p>If a warrant is granted, we'll notify you of the date and time on which we intend to execute the warrant.</p> <p>If a warrant is not granted, we will inform you of the reasons.</p> <p>We may engage bailiffs to serve the warrant on your non-household customer. Before the day of the execution of the warrant, we will contact the police and, if necessary, we will contact the police if there is breach of the peace during the execution of the warrant.</p> <p>What happens when we gain access</p> <p>Once we have gained access to the premises, we will attempt to take a meter read and will let you know the outcome of our visit. If we have had to force entry, a locksmith will be required to leave the premises secure once we have finished. Your customer will be notified of where they can collect the new keys to the property. You will be charged for these services.</p> <p>When we gain entry to your non-household customer premises, we will read the meter. If the meter is found to be broken, faulty or missing, where possible we will exchange or</p>	

	replace the meter during the visit. Charges may apply. For more information please refer to our Wholesale Tariff Document.
Charges:	Charges apply to this service. For more information, please refer to our Wholesale Tariff Document.
Availability:	Appointments will be made during our normal working hours (excluding bank holidays and public holidays): <ul style="list-style-type: none"> • Monday – Friday, 8am – 5pm • Saturday, 8am – 1pm
To order:	To order this service, please submit T/O19 Power of Entry to enable a meter read request along with associated documents outlined above. For more information about how to order services please refer to managing service requests .
Service Levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • we will confirm whether your request has been accepted or not within 5 business days of receipt of the service request form • we will close your application if additional information requested to support your application is not provided with 15 business days of our request for additional information • after phase I has been completed, if you do not confirm you want to proceed to phase II within 15 business days we will close your application. <p>Due to the complexity of this service and the case by case nature it will not be possible to provide an end to end timeframe for this activity. Hearing of warrant applications will be dependent on court availability.</p>

Network operations – Capital works

ID:	SC-W093	Service:	Managing short term planned capital works
Description:		<p>We will notify you of our short term activities where we expect or reasonably expect to have an effect on water services and/or wastewater services provided to your non-household customer, at least 22 business days before the estimated works start date, on In your area including:</p> <ul style="list-style-type: none"> • where the works will be taking place • the nature of the work that we will be carrying out • the likely impact of the planned work on your non-household customer's water and/or waste services • any alternative arrangements that we intend to make. <p>We will accept your feedback on our short term plans through a web-based form, available on our portal. Feedback received up to 5 business days after the short term plans have been published will be taken into consideration. We'll send you an email to acknowledge receipt.</p> <p>Any changes to our short term plans will be re-published on In your area for you to view, at least 10 business days in advance of the work starting.</p> <p>Outside of our control</p> <p>If our scheduled interruption is delayed, for reasons outside of our control, by more than 48 hours we will notify you at least 48 hours in advance of our new proposed supply interruption date. To save you having to reply, if we do not receive feedback within 1 business day, we will assume acceptance of the rescheduled interruption.</p> <p>We highlight that our plans are live documents and subject to change. Where changes are made, we will notify you and other third parties as soon as possible via In your area.</p> <p>Modifying the proposed start date</p> <p>In the rare circumstances where we need to change our estimated planned start date, we will notify you of our new proposed start date. To save you having to reply, if we do not receive reasonably justified feedback within 1 business day, we will assume acceptance of the re-issued start date.</p> <p>Before undertaking work, we will notify your non-household customers who are likely to be affected, by letter drop.</p> <p>Updating the plan and changes to permit</p> <p>We need to obtain permits and notices from local authorities and other external organisations (e.g. Transport for London) to carry out our capital work. The permit and any notices will determine (not an exhaustive list):</p> <ul style="list-style-type: none"> • work reference • estimated start date • exact location • working hours • traffic management. <p>We will notify you of a change in the start date or planned supply interruption if it exceeds ± 5 business days from the scheduled dates due to permit constraints.</p>	

	<p>Letter drops</p> <p>We will carry out a letter drop to all affected customers in advance of the planned works start date, describing the nature, estimated duration of the project and any other relevant information.</p> <p>Visits</p> <p>We will contact your non-household customers directly to arrange a time to visit. For any planned visits, we will let you know 2 business days in advance. You should notify us if you want to be present during our planned visit. For any unplanned visits, we will notify you within 2 business days after the visit, or sooner if possible.</p> <p>In either case, we will email you a copy of any notice or correspondence issued to or served on your non-household customer during the visit. We will do this within 2 business days of completing our visit.</p>
Charges:	Charges do not ordinarily apply to this service.
Availability:	<p>We make available notifications on our short term plans related to capital projects, to you and other stakeholders with a keen interest in the development and implementation of our work and contingency plans related to capital works.</p> <p>Where required, we may run a drop-in centre to share project information to whoever wishes to attend. Time and location of drop-in centres will be made available on In your area.</p> <p>You can submit your feedback via our web platform 24/7. Any feedback that we receive after the relevant deadlines will be considered to be invalid and will not be taken into account.</p> <p>Working hours are generally confirmed by the local authorities. Our normal working hours are:</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 5pm

ID:	SC-W041	Service:	Managing long term planned capital works
Description:		<p>We need to carry out planned, large scale water and waste capital projects on our assets, so we can keep providing your non-household customers with high quality water and waste services. We will notify you of the capital projects we intend to carry out, and allow you to comment and give us feedback on our work plans before they are finalised and the work starts.</p> <p>Examples of the types of large scale water and waste projects we conduct include (not an exhaustive list):</p> <ul style="list-style-type: none">• water mains replacement• pressure management• sewer installation, requiring connection into the existing network• sewer replacement• upgrades to, or the creation of, new pumping stations• upgrades to water or sewage treatment works. <p>We don't plan on interrupting your non-household customers' water or waste services. However, our work may need a short service interruption to your non-household customers due to the complex nature of the work.</p> <p>We will work hard to minimise any disruption that our work has, particularly works impacting your sensitive customers. We will use our 'Always in Supply' practices, such as: line stops, infusions and tankers, to mitigate against service interruptions, where necessary. Our response can vary, depending on location and other operational constraints.</p> <p>Notifying you of our long term plan</p> <p>We will let you know of our long term plans, which may interrupt water or waste services every quarter. These will be published via the bilateral hub providing information on:</p> <ul style="list-style-type: none">• the programme of work• the type of work and the techniques we plan to use (e.g. water mains replacement)• the affected geographical area(s), by postcode outcode (e.g. RG2)• the likely level of disruption to your non-household customers. <p>Accepting feedback on our long term plan</p> <p>We accept your feedback on our long term plans, provided you've submitted them within 10 business days of the plans being publicised. You can submit your comments via bilateral hub.</p> <p>Liaising with local authorities</p> <p>We will liaise and work with the local authorities to carry out our street work activities.</p> <p>We aim to submit street work permits for major works at least 3 months in advance of the scheduled date. If minor changes are required to the permit or an adjustment of dates as a result of feedback, the proposed dates may be adjusted.</p> <p>Visits</p> <p>We will contact your non-household customers directly to arrange a time to visit. For any planned visits, we will let you know 2 business days in advance. You should notify us if you want to be present during our planned visit. For any unplanned visits, we will notify you within 2 business days after the visit, or sooner if possible.</p>	

	In either case, we will email you a copy of any notice or correspondence issued to or served on your non-household customer during the visit. We will do this within 2 business days of completing our visit.
Charges:	Charges do not ordinarily apply to this service.
Availability:	<p>We make available, notifications on our long term plans related to capital projects, to you and other stakeholders with a keen interest in the development and implementation of our work plans related to capital works.</p> <p>You can submit your feedback via bilateral hub.</p> <p>No preferential treatment will be provided to any feedback received.</p>
To order:	This is not a service you can order.
Service levels:	<p>We aim to provide the following service levels as referred in MOSL's Operational Subsidiary Document(s)</p> <ul style="list-style-type: none"> • OSD 0705 (Bilateral Processes for Part D: Planned activities and affected services). Process D1

Network operations – Water network

ID:	SC-W042	Service:	Managing short term planned work
Description:		<p>We need to carry out essential works on our network so that we can keep providing your non-household customers with consistently high quality water services. Work planned at least 22 business days in advance is known as short term planned works and we will notify you of our plans. These works may interrupt supply of our usual services to your non-household customers.</p> <p>We may need to carry out repairs and upgrades of our assets, i.e. short term planned work, in the following instances:</p> <ul style="list-style-type: none"> • to avoid unplanned changes to water services, including changes to drinking water supply or public health/safety risks • to avoid potential leaks or wastage of water. (e.g. leaking water main) • to prevent damage to the network or other infrastructure. (e.g. water main replacement). <p>We will work hard to minimise any disruption that our work has, particularly works impacting your sensitive customers. We will use our 'Always in Supply' practices such as line stops, infusions and tankers, wherever it is reasonably practicable to do so. Our response can vary depending on location, work volumes and other operational constraints.</p> <p>Plans and notices</p> <p>If our short term planned work is likely to affect water services provided to your non-household customer, we will make our planned work visible to you, on In your area, as soon as is reasonably practical to do so and at least 22 business days in advance of starting the short term planned work.</p> <p>The information shown on In your area will let you know:</p> <ul style="list-style-type: none"> • the geographical areas affected • the nature of the work • the date and times when the supply is likely to be interrupted • the likely impact on water services • any alternative arrangements that we propose; and, • any additional information relevant to your sensitive customers. <p>We accept comments from you about our work plan, submitted within 5 business days of making it available. We will consider your comments and where appropriate, we will re-issue the plan at least 10 business days before works are due to start.</p> <p>We will keep you updated of our works progress via In your area.</p> <p>If we expect your non-household customers' water supply to be interrupted for longer than 12 hours (this is what we consider to be a major interruption), we will let you know our contingency plan and actively engage with you.</p> <p>We will not carry out planned interruptions to supply which are expected to exceed 4 hours.</p> <p>Outside of our control</p> <p>If we are unable to complete the work as planned, for reasons outside of our control, we will notify you at least 48 hours in advance of our new proposed supply interruption date.</p>	

	<p>To save you having to reply, if we do not receive feedback within 1 business day, we will assume acceptance of the re-issued plan.</p> <p>Modifying proposed start date</p> <p>In the rare circumstances where we need to respond to immediate emergency works or other operational constraints, requiring us to change our planned start date, we will notify you of our new proposed supply interruption date. To save you having to reply, if we do not receive feedback within 1 business day, we will assume acceptance of the re-issued plan.</p> <p>Before undertaking work, we will notify your non-household customers who are likely to be affected, by letter drop.</p> <p>Visits</p> <p>We will contact your non-household customers directly to arrange a time to visit. For any planned visits, we will let you know 2 business days in advance. You should notify us if you want to be present during our planned visit. For any unplanned visits, we will notify you within 2 business days after the visit, or sooner if possible.</p> <p>In either case, we will email you a copy of any notice or correspondence issued to or served on your non-household customer during the visit. We will do this within 2 business days of completing our visit.</p>
Charges:	Charges do not ordinarily apply to this service.
Availability:	<p>We make available to you notifications on our short term plan works within our specified service levels.</p> <p>We will usually carry out our work during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 5pm <p>However, where it's necessary, for example due to traffic management or operational constraints, we may carry out our work at any time (24/7).</p>
To order:	This is not a service that you can order.
Service levels:	<p>We aim to provide the following service levels as referred in MOSL's Operational Subsidiary Document(s)</p> <ul style="list-style-type: none"> • OSD 0705 (Bilateral Processes for Part D: Planned activities and affected services). Process D2

ID:	SC-W043	Service:	Managing of reactive activities
Description:		<p>We may need to carry out works on our network, at very short notice, so that we can keep providing your non-household customers with consistently high quality water services. These works, not forming part of a long or short term work plan, are known as reactive works and may possibly interrupt the supply of our usual services to your non-household customers for a short period.</p> <p>We may need to carry out reactive works in the following instances:</p> <ul style="list-style-type: none"> • to avoid unplanned changes to water services, including changes to drinking water supply or public health/safety risks • to avoid actual or potential leaks or wastage of water • to prevent damage to the network or other infrastructure • to repair assets which you or other members of the public have told us that are faulty. <p>We will work hard to minimise any disruption that our work has, particularly works impacting your sensitive customers. We will use our 'Always in Supply' practices such as line stops, infusions and tankers, wherever it is reasonably practicable to do so. Our response can vary depending on location, work volumes and other operational constraints.</p> <p>Notices</p> <p>If our reactive work is likely to affect water services provided to non-household customers, we will let you know via In your area as soon as is reasonably practical to do so and at least 48 hours in advance of starting work.</p> <p>The information shown on In your area will let you know:</p> <ul style="list-style-type: none"> • the geographical areas affected • the nature of the work • the date and times when the supply is likely to be interrupted • the likely impact on water services • any alternative arrangements that we propose; and, • any additional information relevant to your sensitive customers. <p>Where we need to carry out the work in such time that we cannot provide 48 hours advance notice, we shall consider the work to be an "unplanned change" in water services. For further information, please refer to our communicating unplanned changes in our services service.</p> <p>We will let you know when there is likely to be an interruption to your non-household customers' water supply by:</p> <ul style="list-style-type: none"> • giving you at least 48 hours' notice via In your area • updating In your area when we start the work and again when we complete it • e-mailing you with any relevant additional information, if any of our reactive activities are likely to have an impact on any of your sensitive customers • e-mailing you with details of our contingency plan, if we expect your non-household customers' water supply to be interrupted for longer than 12 hours. <p>Visits</p> <p>We will contact your non-household customers directly to arrange a time to visit. For any planned visits, we will let you know 2 business days in advanced. You should notify us if you want to be present during our planned visit. For any unplanned visits, we will notify you within 2 business days after the visit, or sooner if possible.</p>	

	In either case, we will email you a copy of any notice or correspondence issued to or served on your non-household customers during the visit. We will do this within 2 business days of completing our visit.
Charges:	Charges do not ordinarily apply to this service.
Availability:	<p>We will make available to you notifications of our reactive works within our specified service levels.</p> <p>We will usually carry out our work during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 5pm <p>However, where it's necessary, for example due to traffic management or operational constraints, we may carry out our work at any time (24/7).</p>

ID:	SC-W082	Service:	Repairing outside stop valves
Description:	<p>If we're notified of a faulty outside stop valve we'll carry out a site visit to locate the outside stop valve and assess the fault to determine what remedial action is required. If necessary, we'll arrange the visit directly with your non-household customer and notify you of the date and time of the visit, where the visit is planned more than 2 business days in advance.</p> <p>If the visit cannot be planned more than 2 business days in advance we will carry out the visit and notify you of the visit within 2 business days of the visit taking place and provide copies of any correspondence or notices served.</p> <p>If your non-household customer contacts you to report a fault with an outside stop valve or cannot locate the outside stop valve, redirect them to us.</p> <p>If we are able to locate an outside stop valve and a standard repair can be made, we'll carry out the work on the first visit.</p> <p>The repair will be considered to be standard if:</p> <ul style="list-style-type: none"> • the outside stop valve does not need to be replaced • excavation work is not required • roadworks permits are not required to undertake the repair • there are no Traffic Management Act measures required • there are no access restrictions. <p>If the repair is non standard or one or more of the following applies:</p> <ul style="list-style-type: none"> • the fault is causing a risk to health and safety, e.g. a trip hazard on public highway • the outside stop valve is leaking • the fault is restricting the supply of water. <p>we will carry out the repair as soon as reasonably practical.</p> <p>In most cases we'll make a permanent reinstatement following replacement of the outside stop valve, but if this isn't possible we'll make temporary reinstatement and complete permanent reinstatement within six months.</p> <p>For work carried out outside the boundary of the premises any special surfaces, i.e. modular blocks, natural stone, bricks, and cobbles etc. shall be salvaged following excavation and stored for replacing at the time of permanent reinstatement.</p> <p>Reinstatement within the boundary of the premises will be to a safe and level standard. However, we will endeavour to salvage any special surfaces, i.e. modular blocks, natural stone, bricks, and cobbles etc. following excavation which will be stored for your non-household customer to carry out their own reinstatement.</p> <p>If we cannot locate an outside stop valve, we will notify your non-household customer and advise them to contact you if they would like an outside stop valve installed.</p> <p>If a customer side leak is suspected we'll arrange for further investigations to be carried out.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	<p>You, non-household customers and the general public may report faulty outside stop valves, ask for assistance locating an outside stop valve or turning off their water supply by phoning our wholesale contact centre.</p> <p>If an appointment is required, it will be available during our normal working hours (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 9am – 1pm 		

	<ul style="list-style-type: none"> Monday – Friday, 1 pm – 5pm <p>If we're unable to attend an appointment, we'll notify you and/or your non-household customer with at least 24 hours' notice. If we don't attend an appointment we'll provide compensation in accordance with our Guaranteed Standards Scheme Regulations.</p>
To order:	To order this service, please phone our wholesale contact centre.
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> within 5 business days of being contacted, or at a date and time agreed with your non-household customer, we'll arrange a site survey to assess the work that is required where a standard repair is required, where reasonably practical we will repair the outside stop valve on the first visit where a repair was not possible on the first visit carry out the repair as soon as reasonably practical. <p>Where a street works permit or Traffic Management Act measures are required all service levels are dependent upon the availability of a street works permit.</p>

Network operations – Wastewater network

ID:	SC-WW001	Service:	Maintaining flooding prevention devices
Description:	<p>A Flood Local Improvement Project (FLIP) is typically a small package pumping station installed at one or several properties to alleviate flooding. However, it may also comprise of an active non return valve.</p> <p>We consider a Flood Local Improvement Project device to be an asset that has the majority of the following characteristics:</p> <ul style="list-style-type: none"> • an “active” device to protect properties from flooding • a small-scale solution for single/multiple properties or small commercial premises • located on private property • powered from the customers’ electricity supply • no telemetry linking to our systems • low lift pumping unit into adjacent sewer (no pumping over extended distances). <p>What we provide</p> <p>We provide a maintenance and reactive service for all Flood Local Improvement Projects whether they’re installed at a household or non-household property. The maintenance plan depends on the condition of the asset and pump size. Typically:</p> <ul style="list-style-type: none"> • 6 monthly visits for double pump • 12 monthly visits for single pump. <p>Where required, we will reassess the frequency of the maintenance visits and increase them, dependent on the condition of the asset. The maintenance plan is created when the Flood Local Improvement Project is installed. We agree this plan depending on the condition of the asset and pump size. The plan is then managed and work is released and scheduled for us to visit the non-household customer. We will contact the non-household customers to confirm attendance to the property. If further work is necessary, we will contact the non-household customer to confirm and arrange further attendance.</p> <p>The process</p> <p>Alongside planned maintenance, we may have unannounced or unplanned visits. We encourage non-household customers to call our wholesale contact centre when the property has an emergency and we need to make an unplanned visit.</p> <p>If we’re called out to carry out unannounced or unplanned work for the non-household customer, we will notify the retailer within 2 business days after the work has been completed.</p> <p>During our visits (both planned and unplanned), we won’t disrupt the waste or water services that the customer is receiving.</p> <p>An agreement will be established with the owner and occupier, as access is required to the premises for both access to and maintenance of the Flood Local Improvement Project device.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	This service is available to any non-household customer that currently has a Flood Local Improvement Project device installed.		

	<p>When carrying out planned maintenance activities we offer appointments to non-household customers where access to the property/building is needed. We offer two time slots (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 12.30pm • Monday – Friday, 12.30pm – 3.30pm <p>We typically carry out planned maintenance activities between (excluding bank holidays and public holidays):</p> <ul style="list-style-type: none"> • Monday – Friday, 8am – 3.30pm <p>We will call your non-household customer to make appointments. We will attempt to call the customer on three separate occasions. If we still have no success, we will send the customer a letter advising them that we need access to carry out maintenance on the asset, and we will arrange for a technician to visit the property. Gaining access to the non-household premises is not usually an issue for us.</p> <p>Once an appointment with the non-household customer is confirmed, we will let you know at least 2 business days in advance of that appointment.</p> <p>Unplanned visits can be carried out 24/7 by a standby service we provide.</p>
To order:	This is not a service you can order.
Service levels:	<p>We aim to provide the following service levels as referred in MOSL's Operational Subsidiary Document(s)</p> <ul style="list-style-type: none"> • OSD 0705 (Bilateral Processes for Part D: Planned activities and affected services). Process D2 and D3
Documents related to this service:	<p>Please refer to the following relevant documents:</p> <ul style="list-style-type: none"> • Guaranteed Standards Scheme Policy

ID:	SC-WW051	Service:	Maintaining pumping stations
Description:	<p>Small sewerage pumping stations are pumping stations that serve a number of properties, which prior to October 2016 were privately owned. From October 2016 we became responsible for private pumping stations that meet the eligibility criteria:</p> <ul style="list-style-type: none"> • be in service prior to 1 July 2011 • be connected to the main sewerage network (either foul or surface water), and; • either serve more than one property, or, sit outside the curtilage of the property it serves. <p>We will adopt the pumping station providing it meets the eligibility criteria. Once adopted we will carry out a survey and service the pumping station. We become responsible for maintaining the pumping station from the time of adoption.</p> <p>During the first 12 months following adoption we will maintain the pumping station based on the previous owner’s maintenance schedule. After this initial period we will assess the pumping station and carry out maintenance based on the condition and history. The maintenance plan is then managed month by month.</p> <p>Alongside planned maintenance, we may make unannounced unplanned visits. A call is made, usually by your non-household customer, to our wholesale contact centre, or our control centre is alerted to the alarm by our telemetry systems.</p> <p>Calls will be accepted directly from your non-household customer in an emergency. A job will be raised and a visit will be scheduled.</p> <p>A contract/agreement will be established with the owner and occupier to allow access to the pumping station and we may make payments to non-household customers for the electrical running costs of pumping station.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	<p>This service is available to non-household customers that have a private pumping station that fits the eligibility criteria. Planned maintenance activities are typically carried out between the hours of Monday – Friday, 7am - 5pm.</p> <p>We may carry out visits 24/7 to respond to unplanned changes in the performance of the pumping station, which may be identified by the non-household customer or our monitoring systems.</p>		
To order:	This is not a service you can order.		
Service Levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • where we have arranged to carry out a visit to a non-household premises and the visit is planned 2 business days or more in advance we will tell you when the visit will take place • we will notify you of any unplanned visits to your non-household customers’ premises within 2 business days of the visit. <p>The severity of any faults or alarms will determine the time within which we will respond. When reporting a problem the caller will be provided with an estimated time of arrival.</p>		

ID:	SC-WW006	Service:	Responding to blockages, odour and external floods
Description:	<p>Report of an issue</p> <p>If you're contacted by your non-household customer and they're experiencing a blockage or symptoms of a blockage, an odour or external flooding, you should redirect them immediately to their wholesaler. You may use our postcode lookup on our website to check whether your non-household customer is within our waste operational area. Non-household customers may contact us 24/7. We'll then share our next steps.</p> <p>Visit and investigation</p> <p>When on site, we may need to liaise directly with your non-household customer to discuss the problem in more detail and gain access to inspection covers inside their property.</p> <p>If we need access to neighbouring properties to carry out investigations, we'll carry on our work and update impacted customer(s) on site.</p> <p>We'll attempt to contact your non-household customer and advise them once en-route.</p> <p>Resolution</p> <p>If the issue is within an asset belonging to a third-party authority, like a road side gully, we won't attempt to resolve the issue. Instead we'll advise your non-household customer to contact the appropriate third-party e.g. local authority.</p> <p>We may offer to resolve an issue within your non-household customer's private drain, subject to our Private Blockages Code of Practice. This service would be sold directly to the non-household customer.</p> <p>We'll investigate and address an issue that results from a blockage within our sewers. We may need access to your non-household customer's property, neighbouring properties or inspection covers in public land to clear this.</p> <p>External flooding – clean-ups and loss/damage</p> <p>We will provide a clean-up service if your customer has flooded as a direct result of a blockage or defect within our sewer. We aim to begin the clean up on the same day, but may need to wait for the water to recede or debris to solidify. The clean-up involves a litter pick of solid items, washing down of hard standing areas and disinfecting of hard standing areas.</p> <p>Where your customer has experienced damage or loss as a result of flooding, we would recommend them to contact their insurer to discuss the problem further.</p> <p>Rainfall</p> <p>It's not always possible to restore the service or stop flooding caused by hydraulic overload attributed to high rainfall levels which overwhelm the sewer network. We usually have to wait for levels to decrease, before cleaning up and considering next steps. More information on that can be found in our carrying out wastewater network follow on work service.</p> <p>Notifying you</p> <p>We will notify you within 2 business days of the completion of our initial investigation visit, regardless of whether we have resolved the issue, confirmed the issue to be third-party or private responsibility, or plan to return and undertake follow on activity.</p>		

	<p>If the issue was reported by another party but your non-household customer is impacted or we need access to their property, we'll also notify you within 2 business days.</p> <p>Excluded from service</p> <p>Where we identify the issue to be within a private or third-party asset, the third-party will need to complete any repairs.</p> <p>This service doesn't include more substantive clean ups, valets, or the removal and replacement of soil, turf or gravel.</p>
Charges:	<p>Charges do not ordinarily apply to this service.</p> <p>Where we resolve issues on customers private drains this service will be sold directly to the non-household customer.</p>
Availability:	<p>This service is available to non-household customer within our operational area. You may use our postcode lookup on our website to check whether your non-household customer is within our waste operational area.</p> <p>You only need to direct or redirect your non-household customer to us when they're reporting incidents related to blockages, odours or external flooding. This service is available directly to your non-household customer, 24/7.</p> <p>We'll let you know where we:</p> <ul style="list-style-type: none"> • conclude an investigation, reported by/at your non-household customer's property • book, change, cancel or attend an appointment with your non-household customer • serve a legal notice to your non-household customer for access.
To order:	<p>This is not a service you can order.</p>
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • we will notify you within 2 business days of the completion of our initial investigation visit, regardless of whether we have resolved the issue, confirmed the issue to be third-party or private responsibility, or plan to return and undertake follow on activity • if we trace the issue to a non-household customer's neighbouring property, and need access to that property or find it impacted, we will also notify that neighbouring non-household customer's retailer within 2 business days of the completion of our initial investigation visit • If an appointment is booked we'll notify you within 2 business days of this being made. If this appointment date or time is changed or cancelled, we'll let you know within 2 business days of this change • if we serve a formal statutory notice to a non-household customer we'll provide notification and a copy to you within 2 business days of this notice being served.
Documents related to this service:	<p>Please refer to the following documents:</p> <ul style="list-style-type: none"> • Guaranteed Standards Scheme Policy • Private Blockages Code of Practice

ID:	SC-WW007	Service:	Responding to internal floods
Description:	<p>Report of an issue</p> <p>When you're contacted by your non-household customer about internal flooding from the sewers, you should redirect them immediately to their wholesaler. You may use our postcode lookup on our website, to check whether your non-household customer is within our waste operational area. Non-household customers may contact us 24/7. We'll then share our next steps.</p> <p>Visit and investigation</p> <p>When on site, we will need to liaise directly with your non-household customer to discuss the problem in more detail, view the area impacted by flooding and gain access to inspection covers inside their property.</p> <p>If we need access to neighbouring properties to carry out investigations, we'll carry on with our work notifying impacted customer(s) on site.</p> <p>Resolution</p> <p>We won't attempt to resolve the issue, if it's within an asset belonging to a third-party, like a road side gully. Instead we'll advise your non-household customer to contact the appropriate third-party, e.g. local authority.</p> <p>We may offer to resolve an issue within your non-household customer's private drain, subject to our Private Blockages Code of Practice.</p> <p>We will attempt to restore the service as soon as possible, where the internal flood results from an issue within our sewer(s). We will need access to your non-household customer's property and we may need access to neighbouring properties or inspection covers in public land to clear this. If we're unable restore service, we'll take mitigating action to address the flooding. For follow on work, see our carrying out wastewater network follow on work service.</p> <p>In the course of resolution, we'll provide a basic clean-up of the flooded area.</p> <p>Internal flooding – clean-ups and loss/damage</p> <p>We will provide a clean-up service if your customer has flooded as a direct result defect within our sewer or as result of heavy rainfall overloading the sewer. We aim to begin the clean up on the same day, but may need to wait for the water to recede or debris to solidify. The clean-up involves a litter pick of solid items, washing down of hard standing areas, disinfecting of hard standing areas, and pump out of a basements, where necessary.</p> <p>Where your customer has experienced damage or loss as a result of flooding, we would recommend they to contact their insurer to discuss the problem further.</p> <p>Next steps</p> <p>Depending on the severity of any storm event or whether the flooding is directly attributable to a problem with our assets we may make a Guaranteed Standards Scheme Regulations payment to you for your non-household customer impacted by internal flooding caused by problems within our asset(s).</p> <p>Rainfall</p>		

	<p>It's not always possible to restore the service or stop flooding caused by hydraulic overload attributed to rainfall levels within the sewer network. We usually have to wait for levels to decrease, before cleaning up and considering next steps. More information on that can be found in our carrying out wastewater network follow on work service.</p> <p>Further work will also be considered, where appropriate, to help investigate or reduce the risk of future flooding, as per our carrying out wastewater network follow on work service.</p> <p>Notifying you</p> <p>We will notify you within 2 business days of the completion of our initial investigation visit, regardless of whether we have resolved the issue, confirmed the issue to be third-party or private responsibility, or plan to return and undertake follow on activity.</p> <p>If the issue was reported by another party but your non-household customer is impacted or we need access to their property, we'll also notify you within 2 business days.</p> <p>Excluded from service</p> <p>Where we identify the issue to be within a private or third-party asset, the third-party will need to complete any repairs.</p> <p>This service doesn't include more substantive clean ups, valets, or the removal and replacement of furniture, flooring or household items.</p>
Charges:	Charges do not ordinarily apply to this service.
Availability:	<p>Our internal flooding investigation and resolution service is available to non-household customers within our operational area. You may use our postcode lookup on our website, to check whether your non-household customer is within our waste operational area.</p> <p>You only need to direct or redirect your non-household customer to us straight away, when they're reporting internal flooding incidents. This service is available directly to your non-household customers, 24/7.</p> <p>We'll let you know when we:</p> <ul style="list-style-type: none"> • concluded an investigation, reported by/at your non-household customer's property • book, change, cancel or attend an appointment with your non-household customer • serve a legal notice to your non-household customer for access.

Protecting customers

ID:	SC-W024	Service:	Protecting customers from bogus callers
Description:	<p>Bogus callers are people who try to gain access to premises in order to carry out an illegal or dishonest act. Many bogus callers pose as water company employees, often claiming to be from the 'water board'.</p> <p>Genuine Thames Water employees or contractors will:</p> <ul style="list-style-type: none"> • carry an identity card and automatically show it to you • wear a uniform that has our company sign or logo • in many cases have a car or van nearby which may show our company logo • be willing to wait outside whilst your non-household customer phones us to confirm who they are. <p>If the caller does not follow any of the above then he might be a bogus caller. In such an event your non-household customer can call our bogus caller helpline on 0800 316 9800 to confirm the caller or call the police. In most cases all our genuine Thames Water employees or partners will visit your non-household customer's premises only after contacting you or your non-household customer.</p> <p>To protect your non-household customers from bogus callers we operate a dedicated bogus caller helpline.</p> <p>If we are made aware of a bogus caller operating in our area we will:</p> <ul style="list-style-type: none"> • verify whether it is one of our employees or not • ask your non-household customer to contact you if they haven't already done so and/or contact the police if it is not one of our employees • notify all retailers of the bogus caller. 		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	You can notify us of suspected bogus callers by either calling the Wholesale Service Desk or by emailing wholesaleservices@thameswater.co.uk .		
To order:	This is not a service you can order.		
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • if we become aware of a bogus caller we'll notify you as soon as reasonably practical and no later than 2 business days of identifying a bogus caller within our operational area. 		
Documents related to this service:	Specific documents do not apply.		

ID:	SC-W026	Service:	Managing sensitive customer changes in service
Description:	<p>When there's an unplanned change in water and/or wastewater services which impacts a sensitive customer, they can contact us directly via phone, or social media contact. We will use the information obtained during these conversations to help us manage the incident effectively.</p> <p>If we become aware of the unplanned change in services before the customer, we may contact them directly using the emergency contact details you have provided. We have processes in place to enable us to respond dynamically to their needs and to meet our statutory or other regulatory obligations.</p> <p>We recommend that customers who are particularly sensitive to changes in the water supply (for example composition or pressure) or are susceptible to issues with their sewerage services, maintain their own business continuity plans for managing events and incidents including unplanned changes in water and/or sewerage services.</p> <p>For further information about how we manage incidents please refer to Managing unplanned changes in our water services service.</p>		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	<p>This service is provided to retailers who have a current contract and are the registered retailer for the premises within our operational area.</p> <p>We provide a 24/7 operations and control service to respond to and manage incidents and events including unplanned changes to water services and/or wastewater services, and we will work with you and your sensitive customers to secure the best outcome for the customer.</p>

ID:	SC-WW005	Service:	Sampling & analysis for trade effluent billing
Description:		<p>Following issuing a trade effluent consent we will assess how trade effluent charges will be calculated.</p> <p>Trade effluent charges are calculated using one of the following methods:</p> <ul style="list-style-type: none"> • standard strength – a predefined effluent strength associated with particular types of discharges e.g. a laundrette • banded billing – allocating the discharge to specific bands, based on its strength and tariff. Commonly called a banded billing case • sampled billing – samples are taken on a regular basis to determine the strength of the trade effluent discharge this can vary your trade effluent charges. Commonly called sampled billing cases. Additional samples may be taken to monitor compliance. <p>Standard strength</p> <p>Standard strengths have been agreed for the following types of discharges:</p> <ul style="list-style-type: none"> • launderettes • car washes • commercial swimming pools • dry cleaners • small/micro-breweries • concrete contaminated sites (batching plants, wheel washes on construction sites) • laboratory glassware washing • bus washes • train washes • contaminated surface water at waste transfer sites • contaminated surface water from gasholders. <p>We will assume a temporary discharge for the clean and flush of a heating or chilled water system will be billed on our lowest charging band unless glycol is present.</p> <p>If a temporary discharge contains glycol then we will calculate the charge based on the percentage of glycol having assumed settled chemical oxygen demand (Ot) and settleable solids (St) values determined by us.</p> <p>However, if we aren't sure that a standard strength category is suitable, or you would prefer charging to be based on sample results, we will take samples to decide a suitable charging approach, either banding or sampling.</p> <p>we will set up your non-household customer's trade effluent billing after a trade effluent consent has been issued</p> <p>we will update the market operator of any changes to the trade effluent operational parameters within 2 business days of confirming the change, in line with the Wholesale Contract/Wholesale-Retail Code.</p> <p>Sample survey</p> <p>If a standard strength is not an appropriate method to use we may need to carry out a sample survey. We will normally collect a minimum of 6 samples from each discharge point. However, we may decide that more samples are needed. We will then use the sample results to determine whether charges should be calculated using banded billing or sampled billing.</p> <p>Banded billing</p>	

	<p>We will analyse the samples for settled chemical oxygen demand (Ot), settleable solids (St) and, if appropriate, ammoniacal nitrogen (At).</p> <p>We will use the averages of the results from the sample survey to identify the strength settleable solids (St) and settled chemical oxygen demand (Ot) of the effluent. This information will be used to allocate an appropriate strength band.</p> <p>We will also assess how much effluent is likely to be discharged and allocate an appropriate tariff based on the likely value of the discharge.</p> <p>We will use a formula known as the Mogden Formula¹ to calculate the band. The tariff (value) and band (strength) will determine the unit cost calculated by the Mogden Formula.</p> <p>Sampled billing</p> <p>We will establish the number of samples which need to be taken using a statistical analysis assessment. A minimum of 24 samples need to be collected per sample point per year.</p> <p>When we have completed our analysis, we will let you and your non-household customer know the number of samples required to be taken per year. The number of samples required will be reviewed annually and we will let you and your non-household customer know if there is any change.</p> <p>We will collect and analyse the samples, if you or your non-household customer wish to collect and analyse the samples instead, you'll need our agreement.</p> <p>If we have agreed an appointment for a site visit and you or your non-household customer are not present as agreed charges shall apply.</p> <p>Please be aware that fixed charges may also apply as per the Wholesale Tariff Document.</p> <p>¹ As per Code Subsidiary Document 207.</p>

ID:	SC-W007	Service:	Ensuring water regulations compliance
Description:		<p>To ensure Water Supply (Water Fittings) Regulations 1999 (hereafter referred to as the water regulations) are complied with by non-household customers and to meet our regulatory obligations we will:</p> <ul style="list-style-type: none"> • promote awareness of the water regulations • review and approve water regulations notifications and drawings submitted with applications for new connections to the water network or changes to existing plumbing systems • carry out proactive inspections of existing premises • ensure the compliance of all new underground pipework systems prior to any new connection to the water network being made • carry out reactive inspections to investigate proposed changes to existing plumbing systems or suspected breaches of the water regulations • respond to water quality incidents <p>Site visits</p> <p>Whilst carrying out inspections, investigating suspected breaches, monitoring confirmed breaches of the water regulations or carrying out enforcement actions we may need to make announced/planned visits or unannounced/unplanned visits.</p> <p>Non-compliance</p> <p>Customers are responsible for the compliance of their premises plumbing systems and to ensure that they don't waste or contaminate the water supplied by us.</p> <p>Where we find an actual or suspected serious breach of the water regulations posing a risk to the contamination of the water supply, we may disconnect the water supply.</p> <p>Where a disconnection is made we will notify the market operator in accordance with the Wholesale Contract/Wholesale-Retail Code and only reconnect the supply when the breach has been satisfactorily rectified. For further information refer to the disconnecting for a breach of water regulations service and reconnecting following breach of water regulations service.</p> <p>Where disconnection is not considered necessary we will:</p> <ul style="list-style-type: none"> • issue the non-household customer with an enforcement notice requiring the breach to be rectified within the specified timescales • inform the non-household customer of the breach and what action we will take • provide you with a copy of any correspondence left with or sent to the non-household customer, including any reports produced • monitor the situation through further visits and if necessary take appropriate enforcement action against your non-household customer to ensure the breach is remedied. We can under Section 75 of the Water Industry Act carry out the rectification works not already completed (your non-household customer will be charged for the work carried out under Section 75). Where we intend to take this action, we will notify you of the date when we intend to visit site to complete the works. Where Section 75 action is not suitable and the breach is not remedied we may decide to prosecute your non-household customer. <p>For details of how to make enquiries regarding water regulations, please refer to our managing water quality and regulations enquiries service.</p> <p>Your obligations</p>	

	<p>Where you become aware of a breach or suspect a breach of the water regulations (or equivalent regulations), you must immediately:</p> <ul style="list-style-type: none"> • inform us by calling our wholesale contact centre. Tel: 0800 316 9800; and, • remind your non-household customer of their obligations to comply with the water regulations. <p>Powers of entry</p> <p>Where we are required to enter your non-household customer’s premises, but are refused entry, we may seek a warrant to use our statutory powers conferred under Section 170 of the Water Industry Act 1991.</p>
Charges:	Charges do not ordinarily apply to this service.
Availability:	<p>We will monitor compliance with water regulations within our operational area and take any appropriate action within our powers to protect the water network and public health.</p> <p>We may carry out site visits at any time and may sometimes visit without notice.</p> <p>If you become aware of a breach or suspect a breach of the water regulations (or equivalent regulations), you must inform us immediately by calling our wholesale contact centre. Tel: 0800 316 9800.</p> <p>Our call centre is available 24/7 to provide support.</p>
To order:	This is not a service you can order.
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • where we are informed of a suspected water regulations breach we will investigate as soon as reasonably practical • where the water regulations visit and non standard water quality visit is planned less than 2 business days in advance we will tell you when the visit will take place, not less than 2 business days following our visit. • we will provide you with a copy of any water quality reports or any notices or correspondence relating to water fittings regulations within 2 business days of the correspondence being given to your non-household customer.

ID:	SC-W094	Service:	Providing of water quality information
Description:	<p>To assist you in meeting your maintenance of records obligations as described in the Regulation 34(2) of the Water Supply (Water Quality) Regulations 2016 we assist by:</p> <ul style="list-style-type: none"> • providing the facility to identify the relevant water supply zones for your customers' premises. This can be done by searching for your non-household customers' postcode on our "Your Water Report postcode checker", this tool is available via our website • providing retailers with a summary of our current Drinking Water Inspectorate Improvement Programmes and associated water supply zone information. This document, updated and circulated quarterly, is available to retailers upon request. The report details the current improvement programmes affecting our operational area and the water supply zones affected. <p>There are four types of legally binding improvement programmes that may be put in place where a water company supplies water that does not meet the required standards or other statutory obligations and where the issue is likely to recur. The Drinking Water Inspectorate Improvement Programmes and Associated Water Supply Zones Information document contains details of these as follows:</p> <ul style="list-style-type: none"> • authorised departures – non-public health related: these set out the steps that the company will take, within a maximum 3 year time period, to achieve compliance for a specific water quality parameter with the relevant UK standard or European Community Directive • notices – public health related: a drinking water inspectorate notice requires us to take certain steps within specified timescales to mitigate an identified risk • undertakings – non-public health related: the company gives an undertaking to carry out a programme of work to secure or facilitate compliance with a standard or other deficiency identified within an agreed timescale. Undertakings are used where there is not a significant risk to human health • enforcement orders – Public health related: the highest level improvement programme. These are served in respect of failures of European standards where authorisations cannot be granted (e.g. e. coli, enterococci at consumers' taps) and if we have failed to meet the requirements of a notice or undertaking. <p>To request a copy of the latest version of the Drinking Water Inspectorate Improvement Programmes and Associated Water Supply Zones Information document, please email us: wholesalemarketservices@thameswater.co.uk.</p> <p>When we receive your request we will:</p> <ul style="list-style-type: none"> • send you the current version of the Drinking Water Inspectorate Improvement Programmes and Associated Water Supply Zones Information document • add your contact details to our distribution list • send you a copy of the latest document quarterly. 		
Charges:	Charges do not ordinarily apply to this service.		
Availability:	You can utilise our website at any time to access our " Your Water Report postcode checker " and identify a non-household customers' water supply zone.		
To order:	To request a copy of the Drinking Water Inspectorate Improvement Programmes and associated water supply zone information document and to be added to the distribution list, or to update your existing details, please email us: wholesalemarketservices@thameswater.co.uk .		
Service levels:	<p>We aim to provide the following service levels:</p> <ul style="list-style-type: none"> • data requests – We shall respond to requests for the Drinking Water Inspectorate Improvement Programmes and Associated Water Supply Zones Information document within 7 business days from receiving the request 		

	<ul style="list-style-type: none">• information updates – We shall release a revised document to those on our distribution list within 10 business days from the end of each quarter of the calendar year.
Documents related to this service:	Specific documents do not apply.

Part D Definitions of terms

Please note- This is a list of the definitions that have been included in our Wholesale Service Offering, except for where definitions are as defined in the Wholesale Contract/Wholesale-Retail Code, which we have not duplicated here.

Term	Description
Abatement	A reduction to a customer's charges, when for example there is no rainwater feeding into the sewer system.
Accredited entity	An entity which has been independently evaluated and accredited under an accreditation scheme to carry out certain activities defined here.
Actual read	A manual or electronic read of a meter.
Agency	This is an abbreviated term for a public agency such as The Environment Agency.
Allowance	A volumetric adjustment applied to the measured consumption of your customer to reduce the chargeable volume for water and/or wastewater services due to firefighting, leakage, non return to sewer or not having a surface water feeding to sewer.
Advanced Metering Infrastructure mode (AMI)	Advanced Metering Infrastructure (AMI) consisting of a system of digital meters, two way communications (smart network), and data management systems implemented to enable metering and other information exchange between utility companies and their customers.
Billing	Means any information and activity relating the calculation of wholesale charges.
Billing sample	A sample of trade effluent taken to calculate trade effluent charges from the results of the sample analysis.
Bogus caller	People who try to gain access to premises, often posing as water company employees, in order to carry out an illegal or dishonest act.
Boil notice	Also known as a boil water advisory or a boil water order, is a public health advisory or directive given by government or health authorities, issued by us to consumers when a communities drinking water is or could be contaminated by pathogens. The notice given will give specific directions based on the type of contamination.
Business continuity plan	An essential part of any organisation's response planning. It sets out how the business will operate following an incident and how it expects to return to 'business as usual' in the quickest possible time afterwards.
Business plan	The plan sets out the investment we intend to make to maintain and improve essential water and wastewater services, and achieve the targets agreed with Ofwat.
Calendar day	Any given day of the year.
Cancellation notice	Notice provided from the retailer to the wholesaler to stop the requested disconnection.

Term	Description
Charging band	A unit cost for trade effluent derived from sample analysis results where the values for settled chemical oxygen demand (Ot) and settleable solids (St) fall within pre-defined range values.
Chargeable service	Any service that attracts a charge.
Consent register	A directory of copies of full trade effluent consents, which is available on our website.
Contract	A legal agreement between two parties.
Customer	A retailer, non-household or household customer.
Customer side leakage	The loss of treated water from your customer's underground supply pipe (which usually run from the property boundary up to the entry to the premises) and therefore not owned by Thames Water Wholesale.
Data logger	Equipment fitted to a meter to record the flow of water through the meter at set intervals (usually every 15 minutes).
Default	A debtor has not paid a debt which is required to have been paid.
Delivery hours	The hours the service will start to be delivered; this is defined as Monday – Friday 09:00 (9am) to 17:00 (5pm) on a business day excluding public holidays or a bank holiday in England and Wales under the Banking and Financial Dealings Act 1971
Discontinuation	A discontinuation of a trade effluent consent to reflect a temporary cessation in discharging trade effluent. We do not offer this service. We will process any discontinuation request as a billing change request.
Drought plan	All water companies in England and Wales are required by the Government to produce a Drought Plan. Our Drought Plan sets out the actions we would expect to take in the event of a drought to maintain essential supplies of water while protecting the environment.
Emergency disconnection	A permanent or a temporary disconnection made by us without any previous warning.
Emergency reconnection	Reconnection where your non-household customer has been disconnected but shouldn't have been.
Environment Agency	The body established by section 1 of the Environment Act 1995 and, as the context requires, any equivalent body with jurisdiction over areas in Wales such as Natural Resources Wales.
Estimated read	Projected consumption based on available historical data.
Exchange	Where a meter is changed, in the context of private meters it refers to circumstances when the meter is changed in size, type or location i.e. not a like for like replacement.
Flatlining	Where the expected data output is either not being provided or only partially provided.

Term	Description
Flood Local Improvement Programme (FLIP)	A flood local improvement program is a flooding device, usually a pump that is strategically placed to mitigate against a premises or premises being subjected to flooding.
Follow on work	Work that we undertake after an initial investigation/action is triggered and service is restored (where it can be restored), in relation to a blockage, flood, pollution or odour, or investigation into rodent activity or defective inspection.
General conditions	Conditions which apply across all services except where specific conditions are detailed at an individual service level. These are can be found in our Wholesale Tariff Document.
Geographical Information System	A system designed to capture, store, manipulate, analyse, manage, and present all types of spatial or geographical data.
Guaranteed Standards Scheme Regulations	Guaranteed minimum standards of service, as laid down in The Water Supply and Sewerage Services (Customer Service Standards) (Amendment) Regulations 2017.
Illegal connection	Any connection made to our clean water assets or distribution network up to the property boundary, which we have not authorised.
Illegal use of water services	Unauthorised connections to the water supply which may include: theft by bypassing or tampering with a meter or making an unauthorised connection to the main, connecting another property onto your existing supply without informing us.
Impractical (when related to installing a meter)	<p>All new and existing non-household properties shall be metered where technically feasible.</p> <p>Due to cost and practicality constraints there are a number of circumstances here we do not meter existing properties; these are defined in our metering policy.</p>
Incident	Any situation which threatens to compromise the provision of water and / or wastewater services and which requires specific actions and management focus to resolve that are not part of 'business as usual'.
In your area	A geographic information system based portal that we use to inform retailers and customers of planned and unplanned changes to water and wastewater services. Previously called TW Live.
Incident management procedures	Thames Water Wholesale procedures designed to ensure that resources are made available to return to normal service operation as quickly as possible and ensure the business and customer impact is minimised where an incident has been escalated.
Infeasible (when related to installing a meter)	We do not believe that any installation is infeasible. It is possible to install a meter at any property, although it may be impractical to do so.
Inset or New Appointments and Variations	A new appointment occurs when Ofwat grants another Undertaker an appointment to provide water and waste water services to customers. A variation occurs when an existing appointed company requests to vary its appointment to change the areas to which it provides services.

Term	Description
Local communication equipment (LCE)	A two-way communication hardware also referred to as a communication smart-point. It is wirelessly installed adjacent to the meter and enables transfer of data from the meter to our systems utilising smart network infrastructure.
Logging equipment	Equipment fitted to a meter to record the average flow through the meter at set intervals (usually every 15 minutes).
Market Operator Services Limited (MOSL)	The company established to exercise certain central market functions in relation to the participation of trading parties in the competitive market.
Materially complete	All mandatory information required is provided and the information is sufficient to enable us to undertake the service which has been requested.
Meter accuracy testing in-service limits	For 'lower range' flow rates the accuracy level is + / - 6% For 'upper range' flow rates the accuracy level is + / - 2.5%
Meter menu	Table that provides a list of meters which comply with the Measuring Instruments Directive (2004/22/EC) and have equivalent certification to BS EN ISO 4064:2014 class 2.
Monitoring Certification Scheme (MCERTS)	The Environment Agency's Monitoring Certification Scheme used to approve instruments, people and laboratories.
Network	The infrastructure of pipework and other assets used.
Non return valve	A valve that permits flow in one direction only.
Non-compliance	A breach of a term or condition of the trade effluent consent or other relevant legislation.
Non return to sewer	The difference between the amount of water used and the amount of wastewater returned to the sewer system.
