[Lower Thames to West London Reservoirs \(LTWLR\) Strategic Resource Option \(SRO\) – gate one submission](#)

Dear Paul,

On behalf of Thames Water, I am pleased to inform of the submission of the LTWLR gate one report. In line with RAPID's gate one guidance, I can confirm that the TWUL Board is aware of the LTWLR gate one submission and has been provided with a copy of the report ahead of publication.

We have worked diligently and efficiently through gate one, and trust that the submission meets the requirements set out by RAPID. The solution at gate one represents a checkpoint early on in LTWLR's development, and further development of the solution will be undertaken ahead of gate two.

We look forward to receiving your comments in anticipation that the LTWLR scheme will progress forward into gate two.

Yours sincerely,

Chris Weston
Chief Executive Officer, Thames Water
